

Submission for Commonwealth Government Covid-19 Response Inquiry

Date 14th December 2023.

Name: [REDACTED]

With only a 1/4 hour of time in learning of this submission and having any time to submit something for it I can only say the following.

- There were alternative health options available that could have been used besides coerced vaccinations. These were put forward by professionals and ignored even ridiculed. This should never happen. Seek these alternatives, they are out there, just as effective if not more effective, and certainly much safer. With evidence and support and statistics to back them up.
- The laws broken by coercion were simply criminal. This should NEVER happen again. The rights and privacy and autonomy of an Australian citizen is not available acceptable to be removed.
- Use education instead of propaganda. And use actual people correctly qualified with training and experience to educate people rather than propaganda and fear mongering by news, politicians and pharmaceutical companies with nothing but dollar signs and bottom lines to worry about. Without actual evidence based information forthcoming I could only seek my own, and what I found was gross inaccuracies is what was being fear mongered to the population. Trust is no longer existent unfortunately.
- The financial benefit to those with the loudest voice and most to gain should never be listened to over other professional and experienced medical scientists and doctors and specialists. Even an average GP's opinion should be listened to, they are face to face with the actual problems. Thousands of experienced professionals around the world were silenced yet have actual real evidence to support their alternatives.
- I cannot produce them right here right now, but there are a number of independent and non-profit studies and statistics published which clearly indicate the "safe and effective" statements were untrue. I.e. people died and have permanent and semi permanent injuries from the vaccines. Countless more than ever reported and acknowledged. This should be investigated fully and accountability brought to those who covered things up.
- Nor can I produce a specific document right now, but there are plenty independently out there, unbiased and highlighting the vaccines were not **proven** to be safe. Nor could have been. While other alternatives to broader health and immunity were ignored or outright banned. Many healthy people were pigeon holed into the masses.

The lack of supporting docs in this submission is not an indication they do not exist.

I am out of time. This was all I had time to write down between learning of this inquiry and the deadline for submissions with the workload I already have this week.

Please note, the manner in which this inquiry is launched, with 'minimal' advertising or coverage of its existence, and then the extremely short time frame for making submissions simply makes it look as though it was planned in a way they few would know about it and /

or have time to make a submission. Particularly in the close approach to the Christmas period. The government response again looks to be extremely deceitful in a deliberate way. This must stop also.
