

Covid inquiry submission

1. [Make no medical sense](#). The vaccinated can still get sick and infect others, while the unvaccinated are maligned as 'unclean' even if they are healthy.
2. [Are a major threat to liberty](#). They force Australians to trade freedoms they were born with for immense State power over their body.
3. [Replace informed consent with coercion](#).
4. [Ignore the power of natural immunity from infection](#).
5. [Assume no reason for abstaining](#). Religious beliefs, youthful health, and previous vaccine injury are all fair reasons to abstain from a vaccine.
6. [Create discrimination](#). Excluding 10-20% of the population from everyday life creates medical apartheid and a two-tiered society.
7. [Are politically toxic](#). They have sparked unprecedented protests globally, for all of the above reasons.
