

Submission to the COVID-19 Response Inquiry.

To, and for the consideration of, whomever it may concern.

In February of the year 2020, the characteristic medical definition of ‘Corona Virus Diseases’ was; ”Corona Viruse Diseases are the second most prevalent viral form associated with the symptomatic presentation of the ‘**Common Cold**’”.

By late March 2020, that definition had been effectively expunged, as had records, and all general awareness of, the 53 pre-existent endemic Corona Virus variants identified at that time.

This critical information was criminally replaced with an all encompassing COVID-19, and an accompanying raft of identifying diagnostic parameters encompassing **EVERY** conceivable symptom of respiratory, digestive, and neurological disease, accompanying corrupt and ineffective pathology measures and protocols.

The emergency response measures mandated by untrained bureaucrats lacking ANY diagnostic, or practising medical credentials, rivalled those of numerous global-pandemic Hollywood blockbusters, and in conjunction with historically negligent critical care protocols, resulted in the immediate, and needless deaths of untold numbers of our societies most vulnerable, these self-same deaths occurring in the **MOST** inhumane conditions of complete social isolation.

The catastrophic psychological impact of ignorant draconian control measures, that rendered absolutely **NO** beneficial clinical, or regulating effect, upon two entire generations of young Australians is incalculable, and the rush to implement mandatory experimental vaccination with corrupted and ineffective vaccine protocols, has cost, and will likely continue to cost, the once free people of this country for decades to come.

The financial consequences of desperate, and irrational lockdowns have resulted in a crippling increase in national sovereign debt, and the annihilation of entire sectors of the business trading, and commercial real estate industries.

Hand in hand with an all but unrecoverable debasement of the public's trust in **ALL** arms, departments, and organisations of, aged, community, public, and private health care provision.

The reality is, in concert with the abject failure of the legislative, judicial, and policing arms of all state governments, the only satisfactory, and restorative measure likely to remotely restore national cohesion, and confidence in bureaucratic, and/or elected government. Would be the establishment of numerous simultaneous investigative Royal Commissions, and the prosecution for Crimes against Humanity, of hundreds if not thousands of government officers, including both elected and unelected officials.

Any suggestion that this nation, the Commonwealth of Australia, should under ANY circumstance be treaty bound to the authority of an unelected foreign international body, vis a vis the WHO, is not only illogical, and irrational, but in the authors opinion an act of Treason, and any supporting, or advocating organisation, council, or individual, according to past unconstitutional, and illegal act or representation, so defined, should be charged, accorded due process, convicted, [REDACTED]
