SUBMISSION FOR THE COMMONWEALTH GOVERNMENT COVID-19 RESPONSE INQUIRY

Please accept this correspondence as my submission for the handling of the Covid-19 pandemic by the Australian Government.

I reject your terms of reference and that a Royal Commission is the MINIMUM BASIC STEP required to address the issue in a manner that is fair and holds those involved accountable.

- 1) We were mortified at the choices made by State and Federal Governments during this period and the threat against Personal Autonomy were like none I have ever seen in my lifetime. To mandate an untested vaccine as a requirement to earn the money to feed your family, cast upon us by those in authority was shameful. Discrimination of Australian workers went against everything we have been building up in this country to protect employees.

Given the data and the information that has come out now from companies like Pfizer, where they tried to hide the data, it proves that the government acted in haste.

- 2) Prevention of free travel between states in a country that has laws to prevent these blocks was so incredibly unethical. The devastation to businesses and families was heartbreaking. It should never have been allowed.
- 3) The over spending on vaccines reeked of corruption. The biggest transfer of wealth in the history of the modern world occurred during this time, mainly because of excessive government spending including Australian Government spending. This needs to be investigated to discover who benefited from the excess waste. The 255 million doses purchased should be proved to have been used and not had 190 million dumber as they were not wanted and had expired.
- 4) The removal of anti-viral medications from the treatment regime needs to be investigated. It is common knowledge that patients are now given these medications but anyone who suggested such treatments were originally attacked by media and AHPRA.
- 5) AHPRA should be investigated for its appalling control of its members in their handling of Covid patients in regards to vaccinations and treatment of patients with Covid. Why are they allowed to make decisions to remove licences off doctors who went against AHPRA directed narratives?
- 6) AHPRA having the Prime Minister Scott Morrisons brother in charge of it was a massive conflict of interest.

- 7) Stopping travel of Australians to and from Australia was a disgusting abuse of human rights. There should be no power going forward stopping you from returning to your own country. The impact of border closures is a human rights issue.
- 8) The closure of schools and universities during this time has had long lasting effects that will never be repaired. Children are missing huge parts of their education because they were locked in their homes.
- 9) The dissolution of mental health as a result of no contact during these ridiculous mandates is something that will be felt for many years.
- 10) Giving indemnity to Pharmaceutical companies that were paid billions of dollars to provide an untested vaccine seems to reek of corruption. Now tax payers have to fund the damage that was caused by a product that tax payers had to pay for.
- 11) The two weeks mandated isolation of people who did work as pilots etc, or who travelled for any reason was a terrible waste of money and time and will have lasting impacts on mental health.
- 12) The media being controlled to deliver the Government dictated diatribe was corrupt at its core in a country founded on free speech.

There are many more things that come to mind but these are some of the major ways that the Australian Government, both Federally and State levels, have grossly mistreated Australians and Australian businesses.

It is my and my families hope, that a Royal Commission will bring to justice the crimes committed against us and for the harm caused.
