

## SUBMISSION RE COVID19 INQUIRY

In addressing the call for submissions for the Covid Inquiry from the Office of Prime Minister and Cabinet, the issues needed to be investigated are as follows:

- Transparency in covid contracts between organizations including pharmaceutical companies
- Vaccine data on mortality rates
- Mask mandates
- Lockdowns
- Misinformation in media regarding the ability of vaccines to block transmissions
- Vaccine injuries
- Media censorship relating to vaccines and their effects
- Silencing of doctors and other qualified personnel such as independent scientists, epidemiologists and the like
- The lack of openness for scientific and medical debate
- The role of AHPRA and ATAGI in censorship and oppression of doctors poor treatment of vaccine injured victims
- The harassment of family members by hospitals
- Border closures preventing families seeing their loved ones, sick or not

Personally, I was [REDACTED]  
[REDACTED] My independent schools for some reason, were unable to organize it for me. As a result, I had to [REDACTED]  
[REDACTED]

The lockdowns particularly affected [REDACTED]  
[REDACTED] Working from home was difficult and [REDACTED] in particular, became depressed due to a lack of social interaction and physical exercise that boys are accustomed to. A typical comment was, "Every day is the same..." This led to withdrawal and a quietness I had not previously seen. I was concerned.

During the pandemic, I lost [REDACTED] The strict, ridiculous rules prevented us from seeing our loved ones, whether it was the nursing home, rehabilitation centers or eventually, hospitals being the worst experiences. One hospital played cat and mouse in allowing us in. A female doctor would try to call me four times a day to ensure I had completed my rat tests, wasn't she supposed to be run off her feet dealing with patients? When I ignored her calls, she harassed [REDACTED] regarding her issues with me! At that same hospital – Boxhill hospital, [REDACTED] should have been released from the covid ward after seven days so [REDACTED] Only then were the team to meet to discuss his release. [REDACTED] He was kept there longer so the hospital could claim the covid payment, in which his covid was over.

In addition to the above, the funeral company charged us [REDACTED] to have the coffin open (we are Greek), as [REDACTED]

The whole covid experience was heart breaking for my family and so many people nationally.

**Governments and affiliates MUST be investigated. A Royal Commission Inquiry into Covid is required and demanded by the people of Australia**
