

To the Honorable Members of the Australian Federal Government,

Subject: Request for a Royal Commission into COVID-19 Response Measures

I hereby submit a formal request for the establishment of a Royal Commission to conduct a thorough and transparent investigation into the Australian government's procurement of COVID-19 vaccines, the establishment and enforcement of mask mandates, the imposition of lockdowns, and the promulgation of vaccine mandates. This request also extends to the examination of misinformation disseminated through media outlets concerning the efficacy of vaccines in preventing transmission, the documentation and handling of vaccine-related injuries, and media censorship and suppression of medical professionals.

Moreover, the inquiry should encompass the activities and policies of the Australian Health Practitioner Regulation Agency (AHPRA) and the Australian Technical Advisory Group on Immunisation (ATAGI) in their oversight and censorship roles. There is a significant concern that these actions have resulted in the silencing of healthcare professionals and a perceived oppression of divergent scientific opinions, which merits thorough investigation.

The lack of clear scientific justification for lockdowns has had a profound personal impact on many, including myself, which resulted in prolonged separation from my elderly parents. Additionally, the enforcement of mask mandates led to distressing experiences of discrimination in public settings, despite possessing a legitimate medical exemption from wearing face coverings.

The necessity for a Royal Commission is underscored by the belief that only such a body can provide the comprehensive and impartial examination required to address the concerns of the Australian public. There is a perception among many citizens that reluctance to initiate such an inquiry may stem from a desire within the government to obscure the full details of its actions during the pandemic.

Considering these serious concerns, it is imperative that the government take decisive action to establish a Royal Commission, thereby demonstrating its commitment to transparency, accountability, and the principles of democratic governance. I, along with others who share these concerns, am eager for the

assurance that all aspects of the government's response to the COVID-19 pandemic will be subject to the highest degree of scrutiny.

I trust that the government will acknowledge the gravity of these issues and will act promptly to address the public's call for a full and transparent inquiry.

Respectfully submitted,

Ms. [REDACTED]
