

I have serious concerns about the COVID 19 mandates and policies that have been trialed in Australia.

The European Medicines Agency (EMA) assessed the COVID 19 global trial experimental vaccines and recorded serious safety concerns. They also identified important risks ahead of the jab rollout in Australia. These three publicly available reports were obviously ignored by the TGA at the time.

These safety warnings were ignored by the Australian health departments in all states. These states could not have implemented their coercive COVID policies without the support and endorsement of the federal government.

Within weeks of the jab rollout in Australia, and also over many months, thousands of serious side-effect cases were reported along with many deaths to both children and adults across the country. Refer to TGA DAEN websites as evidence.

Therefore, I recommend that the federal government : -

1. Stops advertising the jabs as 'safe and effective';
2. Halts the jab recommendations which are clearly doing more harm than good;
3. Stops all conflict of interests involving funds being given from big Pharma to TGA and governments, etc;
4. Stops giving legal indemnity to pharmaceutical companies, and rolls it back to before the trials started;
5. Ensures proper and easier compensation channels for the jab-injured and their families;
6. And, as the Pfizer trial ends in December 2023, I recommend that the federal government immediately publishes the findings publicly on all media platforms to inform the people of the trial outcomes.
