

To Whom it May Concern:

From the beginning of the so called pandemic in 2020, I was sceptical about the fear campaign rolled out by the Mainstream Media. There were many unknowns, decisiveness, and lack of understanding by the health authorities of how to deal with the issue. So, I did some research to see if what we were being told was genuine and to determine what I should do to keep myself and my family safe. A few of the early things that I easily discovered alleviated any fears around what we were being told by the Government, the experts, and the media.

From the very outset in January 2020, people worldwide were led to believe and accept the existence of a rapidly progressing and dangerous epidemic.

I was never afraid of covid, but I was of the Government overreach and the effect on the public of the mainstream media fearmongering. Right off the mark I knew that it was a scam. When I studied the statistics the initial medical models and statistics all had dramatically overrated the dangers of the so called "virus".

I did around two hours of research and knew instantly that something wasn't right. I do have a science degree, but I am no doctor. Hiding the clinical trial data as well as the ingredients in the experimental jabs was a huge red flag for me. So too was the fact that there was a high survival rate (approx. 99.6%), for healthy individuals like me. This combined with a reduced excess mortality at the beginning of the pandemic and no dead people on the street, plus the fact that the fraudulent PCR test (not designed to be a diagnostic tool for any disease) clearly showed that there wasn't a pandemic at all and it would have been better for the public if the Government had done nothing except monitor the situation. Freedom of Information responses also showed that people working in hundreds of 'governments' and health/science institutions in over 3 dozen countries have uniformly failed to provide or cite even 1 record that describes purification of the alleged "SARS-COV-2" or any alleged "variant" from a sample of bodily fluid, tissue or excrement taken from a sick patient, by anyone, anywhere on earth...."

But no, we were told to simply trust the science that the only solution was a vaccine which we were forced into taking. A vaccine, mind you, that went through the same rigorous FDA clinical trials in only nine (9) months that took previous vaccines more than 10 years of clinical evaluation. I believe most adults are intelligent enough to know that this was a lie and that both the near-term (within 2 years) and long-term side effects of a highly advanced biological agent cannot be known in 9 months of human testing, as we are unfortunately learning as a society today.

Australians were initially told that the new mRNA vaccines were 95% effective, but then later told that the injections are not effective at preventing SARS-CoV-2 infection or transmission. This 95% claim that the inoculations were safe and showed 95% efficacy 7 days after the 2nd dose. But that 95% was a 95% Relative Risk Reduction. Absolute Risk Reduction was only 0.84% which is the true figure for evaluating the risk reduction. If the 'vaccines' don't prevent infection or transmission, what are they 95% effective at? (other than causing disease). The trial data also showed that the vaccines also caused harm. So, with a relative risk reduction of 0.84% for a disease that isn't that harmful, there is no benefit if it comes at the cost of increased sickness and death. Well why then did the Government, who knew that the vaccines caused more harm than good, continue with the vaccination campaign and the absurd mandates and lockdown measures?

We are now aware that the COVID-19 injections are NOT safe and effective vaccines and that the claims regarding the integrity and validity of the FDA clinical trials were blatant lies.

If a vaccine can't reduce the risk for a viral infection, how can it reduce the risk for the severe disease that is caused by that viral infection? The answer is it can't.

Media disinformation and the fear campaign were instrumental in sustaining the COVID-19 narrative. Scientific lies and falsehoods have been used to sustain the legitimacy of the COVID-19 policy mandates including lockdowns, the imposition of the face mask, social distancing and the suppression of fundamental human rights. People worldwide were led to believe that Big Pharma's COVID-19 vaccine injections were the "solution".

The entire vaccine programme is based on fear, nonsense, and concocted fairy tales.

However, in Australia, the TGA and ATAGI and other government officials, and some healthcare professionals are still promoting the false claim that the COVID-19 biological injections prevent hospitalizations and severe disease.

Governments, media, big pharma, doctors, nurses, health minister, businesses, and judges who advocated, pushed and forced people to have this injection need to be held accountable. All of these people knew that they were doing the wrong thing, and that the perpetual safe and effective slogan was complete

The official narrative put forth by governments and health organizations has been that deaths in 2020 increased due to the outbreak of the alleged Covid-19 pandemic, with the response to it adversely affecting millions of people worldwide.

However, as the pandemic progressed and a vaccine was developed and distributed, the narrative shifted to focus on the safety and effectiveness of the Covid-19 injection as a means to curb the spread of the virus and reduce the number of deaths.

This narrative was reinforced through various propaganda campaigns, public statements, and official statements, with the message that the vaccine was "safe and effective" and would be "the key to ending the pandemic".

However, the figures and official reports released by governments in the USA, Canada, Australia, New Zealand, the UK and most of Europe have shown that the opposite has happened, with millions of excess deaths being recorded since the mass roll-out of the Covid-19 injections. I closely monitored the NSW hospital data which showed week in and week out more hospitalizations and death in the vaccinated opposed to the unvaccinated. I also monitored the TGA safety reports. Both of these government sourced data highlighted the fact that the vaccines were not safe or effective. This raises the question of why were they not and still haven't been pulled from the market?

This has led to many questions about the safety of the vaccine, the facts of the official narrative, and the integrity of Governments and Public Health bodies around the world.

Government reports from multiple countries have highlighted a significant rise in excess deaths, surpassing what would be expected under normal circumstances. Excess deaths should have fallen following the roll-out of the Covid-19 injections if we were really in the midst of a pandemic that was killing hundreds of thousands of people.

This is all very common-sense stuff that if a layperson like me can work it out, how cannot the Government with all their expert advisors and access to information only privy to them?

"All "Covid-19" tests, diagnoses, statistics, projections, models, analysis, injections, restrictions, requirements, "measures," "counter-measures" and interferences of every kind are invalid and

ultimately based on delusion, misconception, misinterpretation, ignorance, incompetence, incomplete information and/or intentional fraud...

It is very clear to me that virologists practice pseudoscience, and that people acting as so called “scientists,” “public health officials,” politicians and mainstream news reporters have misled people and caused insurmountable harm across the world....”

I was suspended from my job as a school teacher, which there was a shortage of, because I could not give informed consent. In considering the requirements for legally valid informed consent – which can only be given voluntarily and in the absence of undue pressure, coercion, or manipulation – it becomes clear that anyone ‘mandated’ is unable to give informed consent. Why? Because mandates and informed consent are mutually exclusive. If someone is being told they have to have a jab to keep their job then informed consent is not possible, regardless of whether they are willing to receive it for those reasons.

Many understood this, and the seriousness of the new ‘no jab, no pay’ territory we were entering. Tragically, thousands, of people, including me, walked from jobs and careers that spanned decades, in what might be the biggest government-enforced-mass-exodus of a skilled working population. Even more tragically, hundreds of thousands, perhaps more, were coerced into having the jab to keep their job. And let’s not talk about those who were injured or worse.

This, in a so-called ‘free’ country.

Informed consent was not just ‘impossible’ for the mandated. I have serious doubts about whether anyone in Australia gave informed consent to the Covid injections. Australians were subject to politicians and medical technocrats who told us how miserable our lives were going to be if we didn’t get vaccinated. The disgust was tangible, and the message was clear. Somehow Australian authorities subjected us to the ‘largest clinical trial, the largest global vaccination trial ever’ despite treaties, agreements, and codes of conduct that are supposed to protect against such things. I believe the ‘95 per cent’ Covid ‘vaccination’ rate was achieved through undue pressure, coercion, and manipulation of the Australian population.

Were you told you wouldn’t be able to attend weddings, funerals, birthdays, social events, schools, or community services if you didn’t get vaccinated? Undue pressure.

Were you told that you would be unable to work, return home, travel, visit sick relatives, enter a hospital, or obtain medical care if you didn’t get vaccinated? Coercion.

Were you told it was your duty, your social contract, and a way to ‘love your neighbour’ by getting vaccinated? Manipulation.

‘The vast majority of people taking vaccines did it under duress. They had to try to keep their job or maintain their position ... and my heart is broken that so many people have taken the vaccine, and so many have been harmed.’

This same pattern of pressure, coercion, and manipulation was seen around the world.

One of the most important questions that is going to emerge from this issue is going to be one of accountability and liability for all the people who have been greatly injured or been left bereft, because of the Covid vaccine. Because they gave their consent for an injection that they couldn’t give consent to. There has to be some form of accountability, based on the fact that no one could give informed consent.’

This issue of informed consent is about so much more than bodily autonomy. It is inextricably linked to medical freedom... and more.

'Your medical freedom is inextricably linked to your social freedom and your economic freedom.

When that medical freedom is broken, and you begin to do things to your body for other reasons, outside of medicinal reasons, it infringes upon these other circles of freedom, and this can cascade down. We have to bring ourselves out of this.'

So, based on fraud and the fact that no one could give informed consent or had anything to fear, Government overreach has negatively impacted my life in the following ways:

- Conflict and loss of relationships with family, friends, and colleagues.
- Friends, family, and others being affected with vaccine injuries and death.
- Unnecessarily being suspended from work as a teacher and losing a half years pay, resulting in severe financial hardship and the stress accompanying this. I still have not recovered financially. Being coerced into having a jab, to keep your job, is not informed consent. It's the antithesis of informed consent.
- Challenges and increased stresses at work when implementing curriculum during school closures.
- Being physically assaulted twice for not wearing a mask in public.
- Fear for myself and my family over being forced vaccinated. I took my [REDACTED] out of school for six months because I was afraid that the school would force him to get the jab.
- Loss of trust in Government and health authorities and becoming fearful of these institutions.
- Forced to return early from a holiday due to lockdowns and fear of a fine.
- Loss of fundamental human rights, such as being able to visit my [REDACTED] interstate after my [REDACTED] had a [REDACTED]
- Parents forced to get the jab, so they could travel home after visiting me.

All of this harm for nothing. And people have lost a lot more than me. This is a catastrophe!

Please can you ensure nothing like this ever happens again in this country, the people responsible are held accountable, and the victims receive compensation.

Please have some integrity, some righteousness, some courage, some heart to do something to make this country great again.

Regards,

[REDACTED]
