

A Submission to the Australian Government Office of the Prime minister and Cabinet Covid Inquiry

An agreement was made with Pfizer, among others, by the Australian Federal Government to indemnify them against possible injuries caused by their mRNA gene therapy 'vaccine'.

(Note: 'gene therapy' was the term used in Moderna's initial EUA application in the U.S. for use of their version of the mRNA gene therapy 'vaccine'.)

Pfizer has been known to mislead the public when promoting their products, and were charged with criminal and civil offences asserting that they illegally promoted uses of four of their drugs, in approximately 2009, found guilty, and ordered to pay US\$2.3 billion to resolve the allegations.

See: <https://abcnews.go.com/Business/pfizer-fined-23-billion-illegal-marketing-off-label/story?id=8477617>

From the last paragraph in the ABC (U.S.) article (link above), Pfizer would appear to be recidivistic liars when it comes to the promotion of their products.

Why did the Australian Federal Government sign an indemnity agreement with this known (since at least 2009) criminal organisation?

An inquiry is an insufficient investigative tool to discover the truth in this situation.

A full Royal Commission is required to fully investigate what happened and why.

Why, for example, was the 2019 Australian Health Management Plan for Pandemic Influenza ignored when the pandemic broke? And who was it who made the decision to do the opposite of the Plan, which prophetically described why all of the actions that the Government did take would not work and would cause hardship?

It is also necessary to investigate, and report fully on at least the following:

- The vaccine procurement process and the secret vaccine contracts made.

- The vaccine mandates, which suppressed individual informed consent, and human rights, and the later denial that the 'gene therapy vaccines' were mandated.

- The vaccine injuries that have occurred.

- Mask mandates and lockdowns, both of which have been scientifically verified as being useless in controlling/suppressing viral spread. (Scientific research showing that masks don't stop viral spread go back more than twenty years – those that go back beyond the last few years investigated the spread of flu virus, and evidence from the U.S. shows that, when comparing those states that enforced lockdowns, and those that didn't show that each state experienced comparable viral spread.)

- Government misinformation in the media regarding the ability of vaccines to block infection and transmission along with denial of vaccine injuries and deaths and gaslighting of the injured and the families and friends of those who died.

- The AHPRA lack of due diligence on safety, their silence on undeniable harm of the vaccine and their action along with ATAGI to silence the Medical Profession.
