

Issues with the management of Covid response:

1. The prevalence of Covid initially was not of pandemic proportions. In that first year the flu disappeared - and in its place was the count of Covid deaths. This was lower than the usual annual death count for flu deaths. Also - in that year the MSM would report the deaths from Covid each night and 99% of them were over the age of 80 - they should never have even been reported as we are dealing with life expectancy - most of which were often well over the usual life expectancy. I personally did not know one person who had covid, nor did anyone I know, know anyone who had covid. It wasn't till AFTER the mandated injection that covid really took off. I know so many people who have been vaccinated who came down with a serious case of the flu (covid) and they no doubt passed it on to all around them. The cry of 'but I'd have been so much worse if I hadn't been vaccinated' became the catch phrase. Prove this please. I tested positive for covid and was no sicker then those who were vaccinated. Has there ever been a count of deaths from covid in the unvaccinated?? **It was a campaign of Fear - this was one of the crimes of the time and instead of creating fear - it could have been focused more on how to stay healthy, how to boost ones immune system, what to do if unwell - including alternative health - natural therapies, rest and don't socialise till well again, etc.**
2. There is no getting away from the fact that the MRNA Covid injections were and are an experiment. There is no way that they could have had the usual years of safety tests and it's impossible for them to have undergone any longitudinal studies. We were told they were being made at 'warp speed'. For an intelligent race - to inject the entire human race with something developed at 'warp speed' with so little time to observe its impact, seems to be an insane and highly dangerous thing to do. Not only that - these were being developed by companies that [REDACTED]
Do not assume there is only one fix - every body is different and especially when there is risk of harm involved (and there was huge risk involved) there MUST BE CHOICE.
3. Big Pharma are deemed free from liability - so if you're injured, they will take no responsibility. **Change this - Big Pharma need to be liable for injuries or fatalities incurred.**
4. The PCR test that was used to diagnose Covid, was, [REDACTED] deemed an unreliable and unsatisfactory tool to use for such purposes. [REDACTED] said that this PCR test was not made to detect any type of infectious disease. It's designed to pick up a signature of DNA and RNA of the person being tested." <https://fullfact.org/online/pcr-test-> [REDACTED] **People know when they are sick. One didn't need a dubious test to tell them they were sick. The PCR test added to the fear.**
5. Creative doctors who were wanting to assist their sick patients, discovered that certain long approved and off patent medications (therefore cheap and effective), were proving to be helpful. These medicines were suddenly banned and taken off the market. Ivermectin was one of these and it was demonised by the MSM - saying it was a horse tranquilliser, yet it is used widely by humans all around the world and has been for a long time. **Let doctors and scientists do their job and enable them to use their knowledge, wisdom and experience to guide them to find creative solutions. Respect the Doctor/patient relationship with an understanding that different things suit different people. One size fits all is dangerous in medicine as we all have different body chemistry.**
6. Expert and highly regarded doctors and scientists who had serious concerns and were attempting to warn us of pending issues, were targets of smear campaigns, ridiculed, censored and had their careers destroyed - [REDACTED]
Create an atmosphere of safety and respect to encourage and allow robust discussion of findings. Welcome input from a large range of experts.
7. AHPRA's behaviour. This agency silenced all medical practitioners - doctors, nurses, etc - by threatening them with de-registration if they were to question the government narrative in any way. Many left their profession - hence the huge understaffing issues our 'health' sector is

dealing with. **Again - doctors and medical people should feel safe to express and share their observations and findings. They too should have choice - they should never be coerced into taking medication.**

8. The hate campaign waged on anyone who questioned the narrative. The label Anti-vaxer became associated with being selfish, not caring for grandma, a bit crazy - then far right, racist - you name it - they were the outcasts. Anyone who was critically thinking this through and seeing very concerning trends was demonised. So many people lost friends and family through the division created by the government directed MSM narrative. **Embrace different ways of thinking about health and do not demonise people for questioning or viewing things differently.**

9. Through out the entire 'campaign' MSM never addressed promoted how you could boost your immune system and help yourself stay healthy. Things that do help us stay well such as getting out in the sunshine, exercising and socialising were actively taken away from the people. It was never about actual Health. **Promote HEALTH - exercise, healthy diet, sunshine, being out in nature, mental health practices such as meditation etc.**

10. To cover any obvious injuries by the injection, it was deemed that you weren't actually vaccinated until 2-3 weeks after having the jab. Hence - deaths and adverse reactions that followed closely after having the jab and therefore easier to link the cause, weren't counted. **Honest reporting of adverse reactions immediately after receiving the injection - and if there is harm - STOP THE ROLLOUT!**

11. The TGA made it very difficult for doctors to upload patients who'd been harmed by the jab. **Reporting adverse reactions should have been a very easy process - and should have been encouraged.**

12. Those harmed or died are not taken seriously. There have been organised public silent demonstrations called 'The Forest of the Fallen' - that attempts to educate and give a voice to all the injured or fatalities - you never see this making MSM news. **Air a large range of peoples stories so the public know what is happening.**

13. As the outspoken doctors and scientists warned - we are seeing a huge increase in 'turbo' cancers, heart issues, blood clotting issues, strokes, deaths (SADS) etc. The MSM never links the possibility for the increases in these to the injection. **Given the excessive increase in mortality and illnesses and that the only thing that is really different is that people have had multiple injections of an experiment - join the dots and BE HONEST. This should throw enough suspicion, at the very least, to STOP THE ROLLOUT!**

14. There has been a 17% increase in the annual mortality rate since the mandated jab - something you'd expect would be automatically and thoroughly investigated. However, it was put to the vote in the senate, and MP's voted against conducting a royal commission into the excess deaths - one can only imagine why!

Clearly a royal commission into the reasons for the excess mortality rate by an independent expert body with no conflicts of interest, needed to happen. Also - longitudinal studies needs to be set up to particularly follow different groups of people ie - especially women who were pregnant when they received the jab (has there been an increase in miscarriages, still births, health of the babies); women who were breast feeding when they received the jab; and children who received the jab. Monitoring the health of these babies and children over a period of time should be telling.

NOTE - Because the government refused to investigate the reasons for our excess deaths, a group of Australian Doctors who have formed AMPS (Australian Medical Professionals Society) have released a book titled 'Too Many Dead', which is an inquiry into Australia's excess mortality. Here is the link to the ebook:

[https://8630368.fs1.hubspotusercontent-na1.net/hubfs/8630368/Lite_Too-Many-Dead-PDF-with-Cover-MQ-16112023%20\(2\).pdf](https://8630368.fs1.hubspotusercontent-na1.net/hubfs/8630368/Lite_Too-Many-Dead-PDF-with-Cover-MQ-16112023%20(2).pdf)

15. There were so many things that didn't make sense eg. On ANZAC Day in 2021: Melbourne's Dawn Service at the Shrine of Remembrance has been capped at 1,400 people and the CBD Parade has been capped at 5,500 marchers. Attendees are required to apply online and will be approved on a first-come, first-served basis. Yet - that very same day, there were 80,000 allowed at the MCG to watch the football. Other things like Coles and Woolworths could stay open to trade, but the independent butcher and fruit and veg shops couldn't! **What can I say!**

16. The outright lies (Trust the Science - and - It's safe and effective!), lack of balance and emission of truth by the MSM on their reporting of such things as the accurate numbers of protestors, the police brutality and shameful treatment of their fellow Australians who were trying to stand up to what could only be called, Tyranny, the omission of reporting the other side (the concerns) and slanting it so it was as if they were the enemy, etc. **Real journalism needs to come back - where they are interested in reporting the Truth - not reporting in a way that serves to support the government narrative.**

17. There was a blanket amount of money given to people who couldn't work. This meant you had students living at home with their parents, who were used to getting paid a couple of hundred dollars a week from their part time job, suddenly bringing in \$750. I know [REDACTED] managed to save \$20,000 over covid. While a family of 5 whose parents couldn't work were suddenly trying to live on \$750 a week - clearly not enough to cover a mortgage/rent, food etc. **Look at individual situations and give accordingly. Better still - don't take their work away.**

18. Many people are dealing with horrendous adverse reactions - and are not getting any financial support. **If harm has been done through the mandating of a toxic experimental injection and they can no longer work or live life the way they used to - DO THE RIGHT THING and pay their medical bills and cost of living.**

19. Masks, social distancing, lockdowns, mandates - none of it made the slightest bit of difference to the actual spread. Lockdowns destroyed small business and many, many peoples livelihoods. It has changed our society forever, with people now choosing to work from home - at the expense of social contact, which is so important for our mental health. Children's education has been hugely impacted - and children in general have been very adversely effected by the whole ordeal. The management has caused an untold mental health crisis for many.- with suicides being the ultimate cost. These costs far outweighed any benefits of the pandemic measures. **Again - the extent of the harm caused across many sectors - career loss, mental health, financial stresses, general health - eg on going health issues?, suicide rate over this time needs to be fully investigated by an independent reputable body that has no conflicts of interest.**

ENSURE WE EXIT THE W.H.O. - we do not want to be told how we must manage a health crisis by a foreign global body.

I believe we also need to address how we view health. We are blessed with an amazing immune system that is designed to go into action when it encounters something new in its environment. While it is fighting this foreign body we may feel unwell - that tells us we need to rest and look after ourselves while our body does its thing. Next time it encounters this same thing in the environment - it knows what to do and we don't experience the unwell feelings.

Having a human body means that you will sometimes experience illness - and that's ok. The more we look after ourselves - the less likely we are to get sick in the first place.

It is unconscionable that the covid injection is still being given and actively promoted. This injection has caused enormous harm and the rollout of this injection needs to be STOPPED IMMEDIATELY.
