

## INQUIRY TERMS OF REFERENCE

1. *Governance including the role of the Commonwealth Government, responsibilities of state and territory governments, national governance mechanisms (such as National Cabinet, the National Coordination Mechanism and the Australian Health Protection Principal Committee) and advisory bodies supporting responses to COVID-19.*

Governance, on both a national and state level (possibly with 1 or 2 states excepted) was appallingly heavy handed, authoritarian & downright totalitarian. Individual freedoms were totally ignored. The general response was worthy of [REDACTED] dictators, a disgrace for a country like Australia which was built on the notion of freedom and a “fair go” for everyone.

The pursuit by APRHA & the TGA of a South Australian GP (well known to me) who questioned the prevailing Covid narrative went so far as covert surveillance on the GP’s home & business premises & dire warnings about loss of registration [REDACTED]

[REDACTED] Absolutely disgraceful.

The National Cabinet and National Coordination Mechanism was well done, at least so it seemed. The public was kept well informed of what the bureaucrats and politicians wanted to tell us. Nevertheless, **the truth was withheld, and in such a coordinated manner, with state authorities in lock step with the Commonwealth, that it was clearly all planned.** Arguably, this was done to prevent panic, but the evidence that has since emerged about the nefarious role of Big Pharma [REDACTED] in under the counter payments and fudged results (lies) suggests otherwise.

The incompetence of our so-called “Chief Medical Officers”, both state and federal, in not questioning the “advice” from overseas, especially the United States’ CDC and FDA, let alone seemingly not knowing about the lack of credible testing and the fudged results (lies) is breathtaking. Alarming, our health system is run by “Pieter Principles”, marked by their incompetence & me-too isms. When the next “Plandemic” arrives, hopefully not many of the public will take any notice of these so-called CMO’s.

2. *Key health response measures (for example across COVID-19 vaccinations and treatments, key medical supplies such as personal protective equipment, quarantine facilities, and public health messaging).*

The official response to ignore then discredit with dis-information & downright lies (literally [REDACTED] [REDACTED]) about existing, effective medications such as Ivermectin (a Nobel Prize winning treatment) beggared belief. (Even in the early stages of Covid, evidence from experts such as Dr Peter McCulloch and Dr Bob Malone pointed to the efficacy of Ivermectin in treating Covid. In my own case, I was able to source Ivermectin when it was still legal, when I got Covid I took Ivermectin which quickly cured me).

But of course, the government can’t be pushing the public to take unproven “vaccines” costing trillions of US\$ if an existing medication costing a few dollars works, hence the massive dis-information campaign, from PM Scott Morrison down ([REDACTED] [REDACTED]). In my opinion, foisting on the public untried mRNA medications [REDACTED] [REDACTED], which arguably have killed at least 10 million people worldwide, should subject those in authority to criminal sanctions. But it won’t happen, will it ?

The Australian Govt spent \$A1.7 billion on AstraZenaca's failed "vaccine" and gave millions of dollars to University of Queensland to develop its dud "vaccine", yet refused to support Flinders University Prof Nicolai Petrovsky who then had (and still has) the only Australian developed Covid vaccine approved overseas (in Iran), and shown to be not only effective against Covid 19 but with none of the side effects of the "vaccines" approved by the Aust Govt (such as blood clots, myocarditis & peri carditis, Guillain-Barre disease – NONE of these) – my wife and I took Prof Petrovsky's vaccine as a booster in October 2022 and have not had Covid since.

Governments pushed masks even when overseas test results available by that time showed masks were of dubious benefit, even negative. Locking down nursing homes, and preventing relatives from visiting them (full PPE in hospitals excepted), was a heinous decision, that those responsible should come to regret.

The public have now seen through the government double-talk; people have realised that the "vaccines" don't prevent getting Covid or passing it on, even governments now seem to have given up trying to persuade people to take the booster shot with its dubious benefits.

3. *Broader health supports for people impacted by COVID-19 and/or lockdowns (for example mental health and suicide prevention supports, and access to screening and other preventive health measures).*

Lockdowns were a disaster, seriously adversely impacting the jobs and daily lives of millions of ordinary Australians (but not of course those in power making the decisions). The comments by SA's "Chief Medical Officer" that Covid could be caught from pizza boxes and that if one attends a football match at Adelaide Oval "don't touch the football" reek of incompetence. Yet the SA Government renewed her contract!!

4. *International policies to support Australians at home and abroad (including with regard to international border closures, and securing vaccine supply deals with international partners for domestic use in Australia).*

In the early stages of the "Covid 19 Plandemic", PM Scott Morrison seemed unconcerned, then realising that other countries were closing their borders he did the same. At that stage Morrison could have been forgiven for not knowing who he could rely upon for competent advice when so many were panicking. But Morrison's subsequent decision to spend millions of dollars to develop a plant in Victoria to produce the untried & unproven mRNA "vaccine" from Moderna beggars belief. Sheer incompetence, from PM Scott Morrison, Fed Health Minister Greg Hunt, Fed CMO Brendan Murphy, Vic Premier Dan Andrews, Vic CMO Brett Sutton. Does promotion to these high levels necessitate that one leaves one's brain behind ?

(As an aside: when I went to University many years ago I was taught to both think and ask questions: why is it that these days, otherwise smart university graduates take everything governments say without question, as if it were the Gospel ?)

5. *Support for industry and businesses (for example responding to supply chain and transport issues, addressing labour shortages, and support for specific industries).*

Support of industry and business was reasonably well done, even support for local development of masks (despite their ineffectiveness), at least Govt was seen to be doing something.

6. *Financial support for individuals (including income support payments).*

Financial support for individuals was adequate for those only slightly affected but grossly inadequate for those directly affected by the totalitarian actions of Government (like denying next of kin access to dying elderly relatives, lockdowns affecting all levels of society esp the employed),

7. *Community supports (across early childhood education and care, higher education, housing and homelessness measures, family and domestic violence measures in areas of Commonwealth Government responsibility).*

I do not have specific knowledge of these issues.

8. *Mechanisms to better target future responses to the needs of particular populations (including across genders, age groups, socio-economic status, geographic location, people with disability, First Nations peoples and communities and people from culturally and linguistically diverse communities).*

Lockdowns in high rise apartments in Melbourne, populated by “linguistically diverse communities” had especially savage effects.

Irrespective of this Inquiry, for the next “Plandemic” no doubt government will try do more of the same. But I think the Australian public is now awake to the government tactics and thus government measures to control the population won’t be as easy to enforce next time around.

I note that “The Inquiry will consider the findings of previous relevant inquiries and reviews and identify knowledge gaps for further investigation. It will also consider the global experience and lessons learnt from other countries in order to improve response measures in the event of future global pandemics”.

But where is the acknowledgement that the Australian people have been conned by incompetent bureaucrats & nervous politicians who seemingly have no ability to question the bureaucratic narrative ?

Why is no one being held accountable for the disastrous decisions of the last few years ?

**And where are your questions about Covid Vaccine Injuries ?**

Nowhere. It is hard to conclude that this is a serious Inquiry, rather its just window dressing, isn’t it?

For the next “Plandemic”, the people will change but the message will be the same, won’t it ?

In summary, the response led by the Commonwealth with all states in lockstep, the totally fabricated narrative about vaccine testing (“LIES”), the denial of the use of a perfectly effective medication (Ivermectin), the “pushing” of untested mRNA based so-called “vaccines” whose serious side effects are still being felt (e.g. the sudden death of myriads of healthy people from vaccine induced heart problems) and the gross over-reaction to a virus that is serious for the immune compromised but not for most healthy people, was a colossal over reach.

**The Australian political and bureaucratic response to Covid 19 is clearly the worst example of a cynical, dictatorial, totalitarian attack on freedoms in Australia’s history, worthy of the most authoritarian examples [REDACTED] at its height.**
