

## **Covid-19 Response Inquiry**

I have been deeply and negatively impacted by the overreach of the Commonwealth, state and territory governments, health departments, media, corporations and other groups, during the covid-19 'pandemic'.

In November 2021, after 12 years of faithful service working as a tradesman for the same company, I was sacked for the crime of not taking the experimental Covid-19 jab. At the time I was on long service leave. As I was advised would happen, I lost entitlements because I would not resign and the company sacked me.

I was also forced into a lockdown situation that was particularly difficult.

I was devastated. It was a very difficult time as I had mortgage repayments as well as basic living costs. Immediate family members also lost their jobs. It was very uncertain and anxious times. All aspects of my life were badly impacted.

The Commonwealth government's handling of the covid "pandemic" was draconian, destructive, took no account of any alternative views, destroyed our democracy, tramped on peoples' rights and were based on incorrect information and influences.

The Commonwealth government gave way to the states and territories by allowing them to "do their own thing" in closing borders and in issuing their own mandates. The Commonwealth government had the ability to lead, but handed power over to a few in National Cabinet, a secretive entity that did not represent the best interests of the people.

Every aspect of the governments' action have to be scrutinised. Groups like ATAGI and AHPRA must be held accountable for the misinformation they spread, and for their actions.

There must never be mandates like "no jab no job", as well as mask wearing and lockdowns.

The governments' must ensure they use information that is balanced and not driven by an agenda.

The police force must not be used to intimidate and attack people who don't agree with the official line.

The media has to be held responsible for their actions which drove fear and misinformation. Who funds the various media groups must be disclosed.

Patient/doctor confidentiality must not be over ridden.

All key players must be scrutinised for conflict of interests. Who was forming policy and why? The suitability of those making drastic decisions must be examined.

Statistics must be transparent. None of this counting as covid deaths those who died with covid, not from it.

There is much more I can add.

In summary, the response to the “pandemic” was badly managed. Every response must be scrutinised to ensure we never go through such a devastating time again. Groups and individuals must be held accountable for their actions.
