

Since the pandemic, I have met and talked with dozens and dozens of people in my community who had a similar experience to myself. So I feel compelled to share mine.

I have in the [REDACTED] studies with various organisations, who all take a holistic approach to health.

I am not an anti-vaxxer, my children are fully vaccinated.

Part of my studies however followed the commercial interests of vaccine companies and the persuasive tactics and deals done behind closed doors with large associations, and it appears governments around the world.

Luckily early in the pandemic my [REDACTED] General Practitioner [REDACTED] advised me that the vaccine was NOT safe, NOR effective. So I chose to stay home and exercise with my family during the lockdown. I explored other more effective vaccine options and was in the trial for Dr Nicoli Petrovsky's vaccine. The government regulating bodies put his work to bed, despite his pre pandemic fame, and more recently also receiving awards. It can only be assumed it was not commercially viable for the government to engage with his ground breaking vaccine work ??

In disbelief I watched as the [REDACTED] coerced the general public via TV commercials to "get the vaccine". While governments covered childrens playgrounds and advised people to "stay home"

The 2nd most important aspect to GOOD HEALTH after sleep, is Movement. My health declined during the lockdown as did most of the people around me – BIG MISTAKE TO encourage no movement and close gyms and Yoga studios.

Under the guidance of my doctor I had covid once and recovered very quickly. All of my triple vaccinated friends have had covid twice and sometimes 3 times.

It became obvious very quickly that the government were receiving their health advice from global vaccine companies and their marketing departments – which only pushed open minded people to search further for doctors and health professionals who were willing to speak up against the corruption despite the threats from AHPRA. It wasn't hard to find the truth.

Meanwhile people like myself who were not willing to follow the sheep in FEAR were ostracised from the community. Until of course people started to realise that the vaccine was doing NOTHING other than making shareholders happy.

Appalling, disgraceful treatment for people who actually have an idea how to take care of their own health. The government need to be transparent about where the funds came from during the pandemic and cut ties with global vaccine companies. They have actually woken a large portion of society up to their [REDACTED] Because their vaccine certainly did not eradicate the disease ???
