Re: Call for submissions and evidence to the COVID-19 Response Inquiry

Dear Sir/ Madam,

As a brief introduction I am a 58 year old who lives in Victoria. Due to the decision of the Victorian government to violate human rights by “mandates” and legislation for many workers to be injected with novel and poorly tested genetic treatments with uncertain effectiveness, what was already know to be sometimes deadly short term side effects and also unknown long term effects, I was unable to work in my role, and my employer of several years ceased my employment. I was paid only until my last day, and leave owing. I was then unemployed with an uncertain likelihood of obtain work. I was indeed unemployed for weeks and managed only to obtain short term work from home positions with gaps in between in which I was unemployed, and with many employers then and even now not wanting unvaccinated workers.

During the last two years I have cared for others close to me who have been vaccinated multiple times and still caught covid. I am still not vaccinated and have chosen support my health and immune system in healthier ways than the genetic agent injections that are so-called vaccines. Also despite travelling on crowded public transport on most days in more than a year, and during new “waves” I have still not caught covid. I have had a blood test this year for antigens which has shown that I have not had covid.

Meanwhile most people I know that had the so called vaccines have caught covid. Despite multiple injections they have sometimes caught it only a few weeks after the injections. They seem on average to have had worse bouts of covid than the unvaccinated people I know who have caught it.

I know that there has been a most significant rise in excess deaths since the “vaccine” rollout. The government has made tried to avoid discussion on this matter, other than to try to blame any other cause than genetic injections. History will judge these obfuscators for concealment of crime as a crime itself.

Just in my own experience a friend went to a cardiologist recently due to heart issue that has developed after the genetic injections. The cardiologist said there had been a huge increase in heart problems since the jab rollouts. The cardiologist was specific in saying the huge increase was due to the jab rollouts, and not due to covid.

Many times people have sent letters to the government alerting them to many things. Letters have been sent alerting the government to the life saving benefits of certain early treatments. Also to the dangers of the new so called vaccines. These letters have often been sent by highly qualified experts, in their field. Please have your enquiry take the trouble to discover the many letters of instruction and warning that have been sent, and also how they have been ignored and fobbed off by those that they were sent to. The government has instead gone to its cherry picked regular “experts” for advice.

We have seen the governments experts being wrong time and again and who are now avoiding discussing excess deaths, or concealing the cause.

Clearly any inquiry needs to look at the many warning letters that have been sent, and the fact that they have proved to be correct.

The government departments and other bodies cannot claim to have not known, or to have “relied on the best possible evidence” when they have had this information and ignored it, or belittled those that gave it to them.

An inquiry should also look at the many violations of human rights. For example the International Covenant on Civil and Political Rights which states that:

“Article 4

1 . In time of public emergency which threatens the life of the nation and the existence of which is officially proclaimed, the States Parties to the present Covenant may take measures derogating from their obligations under the present Covenant to the extent strictly required by the exigencies of the situation, provided that such measures are not inconsistent with their other obligations under international law and do not involve discrimination solely on the ground of race, colour, sex, language, religion or social origin.

2. No derogation from articles 6, 7, 8 (paragraphs 1 and 2), 11, 15, 16 and 18 may be made under this provision.

Article 7

No one shall be subjected to torture or to cruel, inhuman or degrading treatment or punishment. In particular, no one shall be subjected without his free consent to medical or scientific experimentation.”

Obviously where the government or any employer required the so-called covid vaccines to be taken or a person could not work in their job, this did not allow free consent for the individual.

As the International Covenant on Civil and Political Rights is included in the schedule as part of the Australian Human Rights Commission Act 1986.

The Act says that violations of it are to be dealt with as crimes.

Therefore it is necessary that the violations of human rights such as the mandates that were imposed for vaccinations in order to work or attend university should be treated as crimes, and those responsible should be held to account.

Also for justice for the many who now have heart problems since the so-called vaccines, or who have had other adverse events (e.g. the rise in rapid cancers since the injection roll-outs), and the many other adverse conditions including death, those responsible for imposing these rules and mandates need to be held to account.

We therefore need a Royal Commission to fully investigate this matter and many trials to follow of those responsible.

I submit that the Federal, State Government, and many bodies under the control or paid for by the government along with many institutes and bodies (including the TGA, AHPRA, and the Health Department, and many Education and Research institutes) and pharmaceutical companies) and the people who are in the government and these organizations have partaken in gross acts of abuses of human rights and crimes against humanity in association with the Covid pandemic, and have caused malicious and great harm to people, both to their livelihoods (e.g. by preventing them from working due to mandates), psychological well being, development, and also to their bodily health, including causing people to suffer many adverse conditions due to withholding what could have been lifesaving treatment to people (as in placing heavy restrictions on ivermectin and hydroxychloroquine), and instead giving harmful treatments to people such as the genetic agents ("covid vaccines"), remdesivir, and quickly placing people on ventilators and palliative care.

Should the government again choose to ignore this submission and the many others like this one, this will be yet another crime, and one day the consequences will be faced, whether in this world or the next, and far better it be that this is addressed now by a royal commission and by criminal trials, as in the next world it will be too late for the souls of those who have been responsible.
