

Name: [REDACTED] Age: [REDACTED] Occupation: [REDACTED] Teacher

Summary: I refused to take the Covid Vaccines for reasons given below and as a result at the beginning of 2022 I was not allowed to return to work. I was initially suspended on paid leave for 6 weeks and then without pay. I used up my long service leave and was able to take stress leave due to the financial stress the suspension had placed on me. I was able to return to work in [REDACTED]. I have since been to the [REDACTED] Industrial Relations Commission where not one of my concerns were addressed. I have now been given a reprimand and my pay has been deducted by one pay increment for 18 weeks as a punishment for not conforming to their unethical Covid Vaccine mandate.

I believe there is widespread corruption in the Government and Pharmaceutical industry that has led to crimes against humanity as I believe the Covid Vaccines have caused many injuries and deaths. If people want to take a voluntary Covid Jab then that is their choice, but to mandate an experimental expensive Covid Vaccine that did not prevent the spread of the virus and did not prevent hospitalisation is criminal, especially when there were other cheaper more effective medications available which were banned.

The information below is part of a response that I sent to the Education Department on the [REDACTED] addressing my Show Cause letter threatening to terminate my employment. I have also attached another response that I sent the [REDACTED] Education Department on the [REDACTED] after they decided that my decision to refuse to take the Covid Jab was unreasonable.

**I have some very serious concerns about how safe these vaccines are.**

(I have attached links in the footnotes that support my **reasonable** concerns)

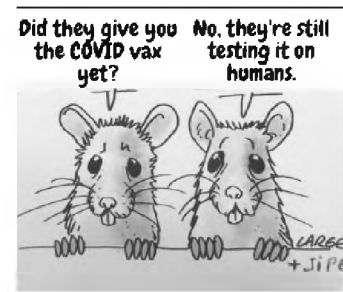

Generally, when I purchase and use a product, I often look at the reviews. Unfortunately, the reviews can be biased, so I often subscribe to CHOICE to get an independent review and that will often influence my decision.

Why hasn't the Queensland Government established an independent Royal Commission to investigate people's concerns about the safety of the vaccines?

I am being told by the Queensland Government that it is reasonable for me to take an experimental vaccine that has not gone through medium- and long-term safety clinical trials and they are claiming that it is safe whereas I am hearing a lot of other people say that the vaccines will permanently damage my immune system and could cause permanent long-term debilitating injury or even death<sup>i</sup>. To make things worse, the vaccines don't even work like traditional vaccines and prevent people from getting the virus.<sup>ii</sup> Some people are claiming that you are at greater risk of catching the virus if you are vaccinated<sup>iii</sup> because the vaccines cause irreparable damage to the immune system.

In order for me to make an informed medical consent before taking the vaccine, I need to be properly informed about the safety of these new experimental vaccines. The Queensland government has failed in its duty of care and has not based their decisions on data from proper medium- and long-term safety clinical trials in order to establish the safety of the vaccines. Without this data the Queensland government cannot claim that the vaccines are safe and are therefore lying to me about the vaccine's safety when they claim the vaccines are safe. The Government representatives originally convinced many people that the vaccines were safe and told people they would prevent people from getting and spreading the Corona virus and things would get back to normal after they were vaccinated. They lied and therefore I do not trust anything else that they say about the vaccines. As these experimental RNA modifying vaccines do not prevent people from getting the virus, like traditional vaccines, that have gone through proper medium- and long-term safety clinical trials, then these experimental vaccines are being used as treatments. Unfortunately, the government seems to be suppressing the truth about the safety of these experimental vaccine treatments.

I was sent this meme with the two rats when the vaccines were first introduced. person who has had three friends suddenly die after taking the vaccine and two who are aware of at least one person who has died from the vaccines but none were recorded as vaccine related deaths. I am also aware of my [REDACTED] who experiencing extremely painful ongoing blood clotting in his leg after taking the other people who have had major ongoing health problems after being If the people who are responsible for mandating these vaccines do not start more due diligence in regards to the safety of the vaccines and it is shown that many vaccine related injuries have occurred then they will find themselves being charged with crimes against humanity. People should not be coerced and bullied in their workplace into taking an experimental vaccine with the threat of losing their career that they have spent many years investing into.

I know one other people of these started vaccine and vaccinated. showing

In order for me to make an informed decision about taking the vaccines I would like the Queensland government to conduct a Royal Commission where an independent, non-political and non-biased commission, that is not in the pockets of the vaccine companies, looks at all of the data, not just the biased data that is propagated by the vaccine companies, Queensland government and the main stream media. They also need to investigate the claims of the medical experts who claim the vaccines were developed during the evil practice of gain of function research<sup>iv</sup> where viruses are intentionally developed along with a vaccine and released into the population in order to make the vaccine companies a lot of money. Many medical scientists claim the vaccines are dangerous and their evidence needs to be heard<sup>vii</sup> [REDACTED]

[REDACTED] What is even more concerning is that these RNA modifying vaccines<sup>ix</sup> use CRISPR gene editing technology where the vaccine companies can slightly change the composition of the vaccine<sup>x</sup> which will slightly alter the RNA without anyone knowing it and Pfizer are already claiming they can change the vaccine to adapt to new variants in the viruses. Unfortunately, they appear to be intending to skip the medium- and long-term safety clinical trials that are designed to protect the public. This could lead to a catastrophic effect on people's health. If these vaccine companies aren't smart enough to develop a vaccine that stops the virus spreading amongst the vaccinated, how can we trust them with any of these modified vaccines especially if they are immune from prosecution if things go wrong.

**In order for me to make an informed decision into whether these vaccines are safe that will enable me to make an informed medical consent, I would like the Queensland Government to establish a Royal Commission that will look at:**

- the real number of severe vaccine injuries being caused by the vaccines. (Some people believe surveys and studies and VAERS data indicate that it could be as high as 25% of the population).<sup>xi</sup>
- The reason why very safe alternate treatments for the Corona Virus were banned by the TGA in Australia and why the government refused to investigate this in parliament. Eg Ivermectin and Hydroxychloroquine<sup>xii</sup>. (This stinks of corruption as it is common practice to use existing medication to treat viruses until the proper medium- and long-term safety clinical trials have been done in order to protect the public<sup>xiii</sup>.) It is common practice in the medical world that if there is a new virus or disease, medical researches start looking at data of people that are taking existing medications for other things to see if they are either immune from catching the Covid Virus or whether they have a quicker recovery rate after catching the covid virus. This was done but the Government seemed to have ignored the findings in favour of more expensive untested Covid Vaccines.
- Why some people that are looking through the initial Pfizer trial data, that has just been released, are saying that the trial data indicates that the vaccines are dangerous and should never have been given emergency status approval?<sup>xiv xv</sup>

- Why so many vaccinated people are suddenly dying and getting blood clotting, heart problems and other chronic conditions<sup>xvi</sup> and whether the Covid Vaccines are responsible for the increase in S.A.D.S (Sudden Adult Death Syndrome) where many more people seem to be unexpectedly dying in highly vaccinated countries<sup>xvii</sup>.
- Why thousands of physicians and doctors around the world accuse Covid policy makers with “crimes against humanity”.<sup>xviii</sup>
- Why mandates are being established in schools where children are extremely low risk of suffering adverse reactions and low risk of dying.<sup>xix</sup>
- Investigate and scrutinise the “medical studies” that have been conducted that have led to the Government not allowing unvaccinated teachers, especially those who have natural immunity, to teach.
- Why some medical experts around the world are saying that the vaccines do not reduce the risk of sickness and hospitalisation? They claim the opposite, that it is the vaccinated who appear to be sicker and hospitalised more often.<sup>xx</sup> Is the government lying again in order to put fear in people to coerce them into taking the experimental vaccines and protect the profits of the vaccine companies? A Royal Commission will find out?
- Why the Government is putting so much trust in the politically biased “medical experts” instead of medium to long term clinical trial data, especially when “medical experts” like the US CDC recently had to retract a direction about recommending people wear masks to stop the spread of monkey-pox.<sup>xxi</sup> When they finally realised it was not an air born virus, they quietly retracted their advice. (What a bunch of incompetent clowns. Are these the types of politically biased “medical experts” the Queensland Government is getting medical advice from?)
- Why some scientists are saying that treating people with Remdesivir in our Australian hospitals, increases the death rate of acute Corona Virus patients.<sup>xxii</sup> They are suggesting that this is being done to intentionally increase the covid death rate<sup>xxiii</sup> to put fear in people so that more people take the vaccines and that will increase the profits of the vaccine companies who are immune from prosecution.
- Why the human rights commission in Australia condemned the actions of the government in mandating vaccines.<sup>xxiv</sup> They recommended the introduction of a bill of rights to protect against government overreach in Australia.

**I am trying  
to follow  
The Science  
but it keeps  
leading me  
back to  
The Money**

**After the government establishes a Royal Commission to investigate these and other concerns, then I will be able to make an informed medical decision as to whether I am going to take the risk of taking an experimental vaccine in order to keep my career as a teacher.**

I do not think it is reasonable for the Queensland Government to mandate for me to take an experimental vaccine if they have failed in following common scientific procedures in ensuring the vaccines had gone through the necessary medium- and long-term clinical trials to ensure their safety and have failed to investigate the concerns of many citizens in a Royal Commission in relation to the safety of the vaccines.

I have already caught the Corona Virus and now have natural immunity and in the opinion of many medical experts, natural immunity is far better than being vaccinated<sup>xxv xxvi</sup>. A clinical trial in Australia showed that a combination of Ivermectin, doxycycline and zinc was very successful in treating people who had caught the Corona Virus and was very successful in preventing hospitalisation and death<sup>xxvii</sup> and I only needed to take the same daily doses over 3 days instead of 10 days as outlined in the trial and recovered very quickly. I sent an email to the Covid compliance Team, along with a letter from my doctor informing them that I had caught Covid and recovered and now had natural immunity but they did not respond to my email.

I am also very concerned that Foetal tissue may have been used in the developing of these vaccines<sup>xxviii</sup>. I believe that using foetal tissue in the development of vaccines is extremely unethical.

**Below are a list of links supporting statements I have made above.**

Thankyou for the time and effort you are putting into this extremely important inquiry which I hope will lead to a Royal Commission.

Kind regards,
