

14th December 2023

I am an extremely concerned citizen, Mother, Grandmother and Sole Trader who like most Australians have been deeply crushed since March 2020.

My [REDACTED] and I have been deeply affected but, I believe some appear to be unaffected so I can only go by my own personal experience.

I come from a Medical, Health and Fitness background as well as sales and customer service. Being a critical thinker I found it very frustrating that health was not being promoted, it was the total opposite. I even questioned the Department of NSW Health on providing me with scientific evidence that masks worked in preventing the spread of viruses as I was only able to find peer reviewed studies (81 at the time) that stated they didn't work. I wrote to our Local MP [REDACTED] on the 7th April 2021 only to be ignored. I wrote to the Governor of NSW Margaret Beazly ACQC on the 25th November 2021, once again ignored with no reply. The only MP who answers my emails and calls was [REDACTED] MP who at the time looked after my [REDACTED] district and Senator [REDACTED] from the Attorney- General's Department.

First of all, my [REDACTED] now [REDACTED] was mandated to receive the Medical intervention AstraZeneca (1 dose) without proper informed consent (I don't think crying in a Doctor's surgery would be classed as consent) just so he could go to work being more than 5klm from his zone, put a roof over his families head and food on the table. He was ill within hours and had a week off his employment. Within weeks he had [REDACTED] which led to numerous doses of [REDACTED]. He is now [REDACTED] and has [REDACTED] of some kind. He is about to undergo a [REDACTED] has he feels he hasn't been the same since. To top that off his [REDACTED] was let go from her employment due to not having the jab even though she was working from home at the time. Her exemption was not accepted, even though her specialist had not recommended she undertake this jab. The stress on both of them has been horrendous.

Secondly my [REDACTED] of [REDACTED] was shut down twice during the NSW lockdowns. The major part of his business was operating from the grounds and hall of the local school and due to the NSW education decimation at the time he couldn't return back to work after the second lockdown. His group fitness programs were destroyed due to these policies.

Thirdly we were not able to attend my [REDACTED] funeral, nor my [REDACTED] funeral due to the Queensland border closures. We were unable to see my [REDACTED] his [REDACTED] and our [REDACTED] due to the Victorian border closures for almost two years. Needless to say the hell that Victorians were put through from the Andrews government.

Our suburb in the [REDACTED] was within those 5klm radiuses imposed, with police patrolling the area to make sure we did not gather and to make sure we were wearing our masks. Helicopters were constantly flying overhead deliberately creating fear.

I came to this country from the [REDACTED] with my [REDACTED] and [REDACTED] and up until now I would call myself a proud Australian. I am a law abiding citizen who has worked hard to raise my family

and continued education that has served the public and now I am being treated like a criminal and being label by the government as an anti- vaxer. Up until now I have had all my childhood vaccinations and so have my [REDACTED]. My [REDACTED] said I was never the same after my [REDACTED] in [REDACTED]. After my last vaccination in [REDACTED] to travel overseas I developed [REDACTED] which took 5 years to overcome. I understand the science as I come from a nursing and medical background and I am witnessing so much corruption and conflict of interests right now. I have lost faith in our government who appear to have been taken over by unelected corporate elites and no longer serve the people and don't have the people's interests at heart. I studied History at school and I listened to my grandparents who had served their countries and it appears history is being repeated very similar to 1933 to 1945. I am now feeling the ripple effect of a medical apartheid very similar to an apartheid I witnessed in South Africa on our way to Australia in [REDACTED]. I have watched our state premiers acting like [REDACTED] and seemed to be competing to see who can be the biggest villain; our prime minister appeared to be doing nothing to stop them.

Why did the states allow the mandating of a vaccine that was a clinical trial until 2023? No one should be mandated to be part of a medical trail with death or injury as a possible outcome. The reports of injury or death are not misinformation and the information is available on various Government websites around the world even though under reported. As friends and family suffer around you, it will be harder for the reports to be hidden.

Forcing a medical procedure onto a person is morally and ethically wrong. In spite of what State and Territory Public Health Directives say, we are protected by Common Law, our Constitution, the Federal Biosecurity Act and several International Treaties relating to Human Rights. Informed Consent and conscientious objection is our right as humans. What is happening in Australia right now can only be described as a medical apartheid, Even the Lancet published November 20, 2021 Stated that Covid –19 stigmatising the unvaccinated is not justified.

I could go on for hours and pages on how much this has affected our family, friends, and clients, our fellow Australians, our businesses and finances.

In summary, I will never forgive those who closed down our business, stoped us from attending our family funerals due to border closures and even preventing us leaving our 5klm radius. We couldn't see our loved ones; we lost family and friends due to the differences of opinion. They continue to censor us from information and won't allow scientific debate. Fines were issue for not wearing Masks without any science to back their insane mandates. They prevented us from entering shops and services needed, made us do everything online. No respect to our privacy which saw employers intrude into the private medical histories and records of their employee's, no regard for the Australia Privacy principles, enshrined in the Privacy Act 1988 (Cth). All while watching the biggest transfer of wealth in history. We are left with our loved ones injured from the medical intervention and we continue to witness the loss of friends and family, yet no one appears to be interested in investigating the excess deaths. A friend recently said to me let it go, it's back to normal now, then why is all the current legislation going through, ready for our state and federal governments to strike again and silence our Doctors and Nurses. I for one WILL NEVER FORGIVE or Forget!

Yours sincerely

[REDACTED]
