

My [REDACTED] and I are not vaccinated. We never caught Covid-19 although we were always around people who were diagnosed. All my other family were vaccinated. Some twice, some 3 or 4 or even 5 times. All have also had Covid numerous times. They have ALL had ongoing health issues, from [REDACTED] and [REDACTED] problems. My [REDACTED] and I were caught up in the [REDACTED] cluster in South Australia. It was very difficult for us, as I am a single parent on a low income and we had to quarantine for 2 weeks. We have no family nearby. I couldn't order groceries online as all home deliveries were fully booked. Further, even if deliveries were available, the cost for delivery was prohibitive on my budget. I did have a [REDACTED] or [REDACTED] representative contact me. I was upset about this because they were given my personal details by SA Health without my permission. Many privacy issues were breached during this time. When I asked what they could do to support me financially and with food during this time, they told me they couldn't do anything. They were just calling to check we were ok! This really frustrated me. We were also ostracised from many social gatherings like the [REDACTED], The Zoo, Restaurants and other venues. We were never unwell. The whole period was and financially and mentally challenging. Especially for my [REDACTED] who loves School. It was a very dark period for our family. This should never happen again!
