

To whom it may concern  
covid-19 response - inquiry/consultation

I am writing to make suggestions for the covid 19 response inquiry and consultation. The points that I feel need attention during this process are as follows:

- Corrupt vaccine procurement and contracts
- Mask mandates and the validity of their efficacy
- Lockdowns
- Vaccine mandates
- Official misinformation in the media regarding the ability of the vaccines to stop transmission
- Vaccine injuries
- Vaccine deaths both died suddenly and those dying later from heart damage
- Media censorship
- Silencing of doctors
- The role of APHRA and ATAGI in the censorship of doctors.
- The loss of dignity for those segregated in nursing home and those dying alone due to the government rules that were inhumane.

Australia needs a Royal Commission to investigate all aspects of the covid 19 situation and this should be a priority for 2024.

Another aspect of the Covid 19 crisis in need of investigation that has affected public trust and morale is the heavy handed attitude and action of the police force. They changed from being those we could call on when we needed help, to a force that went around seeking and fining people. The very action of praying in a church brought a \$1000 on the spot fine which was most disturbing. It should be thoroughly investigated to clearly uncover why and who justified these actions.
