

1. My understanding is that the national cabinet meeting minutes have never been released to the public. Why is this information not available for public viewing as it would add crucial discussion points to the inquiry?
2. Why did the Federal Government disclose that Covid vaccines would not be mandated, however;
 - i. the commonwealth did mandate jabs for aged care,
 - ii. the commonwealth enabled jab mandates with their data sharing arrangements with the states and vaccination databases, and
 - iii. the commonwealth failed to act to protect the human rights of Australians from State and territory governments, and private business owners coercing and abusing their staff on the most basic of human rights, their bodily autonomy.
3. Why has the Federal Government not made public the contracts they have with Pfizer, AstraZeneca and Moderna? These products were paid for by the taxes of the Australia people and as such we demand they be made public.
4. I expect a full and detailed investigation into Vaccine injuries and deaths as I have friends and family who took the covid vaccine/s that have been adversely affected. To date, the medical establishment continues to bury their heads in the sand by deliberately avoiding discussions around vaccines causing many injuries and deaths. It has come to light that the potential repercussions from AHPRA and the Government, if the medical fraternity were to speak frankly against the narrative, could result in the suspension of their duties and job loss. This is unacceptable, and as well the Doctor /patient relationship, which was once sacrosanct, no longer is. This needs to be addressed immediately by allowing Doctors, physicians and the like, the autonomy to always put the patients' needs first, not their own interests or those of Government and AHPRA.
5. The inquiry must investigate the health effects of long-term mask usage in children and adults, compared to the benefits. My experience with mask wearing was it made me dizzy and anxious, yet I've never heard a government health representative disclose the potential side effects. Where was the risk assessment for all the unintended consequences of wearing a facial covering, surgical mask or N95 respirator mask without supervision or oversight, for many hours of the day? Mandatory masking of the population was an abuse of human rights, this cannot happen ever again.
6. I would like the inquiry to examine the Government misinformation in the media, specifically the mantra of "safe and effective" when the vaccines had no

long term safety testing and were still in phase 3 trials when they were rolled out to the people, and further with the use of coercion via mandates. Why was there a need for the Government to create the Covid-19 Vaccine Claims Scheme if they were safe and effective? Because the Government knew they were not, yet they spruked 'safe and effective' constantly via the media and TNI (Trusted News Initiative). This was dishonest and at the very least unethical, as such heads need to roll. All Premiers and those with Health Portfolios, the Chief Health Officers of every state and territory during the Covid response, need to be made accountable, as well [REDACTED] of the TGA.

7. Why did AHPRA suspend doctors that simply questioned the narrative of the vaccine rollout? Why did AHPRA hinder the free speech of the medical fraternity if they had a counter argument to the Government vaccine narrative? Science should always involve healthy debate, especially when the population of our entire country was impacted and affected. Why were the use of early treatment protocols banned and shut down, in some states such as Queensland, with the threat to Doctors who prescribed certain off label drugs with large fines and jail sentences? (eg. Hydroxychloroquine.)
8. Questions need to be asked and answered on why the Australian Government Immunisation Handbook rules were not followed? I personally know people who took the vaccine under extreme pressure of job loss, told the immunisation personnel at the time, yet this was ignored, and the vaccination administered to the patient under duress. These practitioners who administered vaccines under these circumstances were in derelict of their duty, and as such must be held to account.
9. Why are suspected vaccine injured people not treated with respect and comprehensive investigation by doctors? I know people that have had their concerns about their own vaccine injuries brushed aside without adequate investigation completed, often they're told they have anxiety or depressive conditions when this is blatantly untrue. The Government is lacking in transparency and what reeks of a cover up of a failed vaccine campaign, and many Australians who are injured are being dismissed by the medical fraternity because of it. This is unacceptable and unethical.
10. What was realistically achieved by locking down highly populated state borders with regards to transmission of the virus? What is the long-term social impact of locking down the state borders? Under the Australian constitution was it legal to lock down State borders? I personally made the decision to resign from FIFO employment after being quarantined for 14 weeks in total due to interstate quarantine rules, and later vaccine mandated to return to site.

Prior to the mandates, I was classed an essential worker and was able to perform my duties. The inquiry must evaluate how decisions such as these were accepted and enabled when there was neither logic nor scientific reasoning to support these recommendations and mandates.

11. I wish to clearly state as a result of this botched Covid 19 response, I am unequivocally opposed to the Australian Government signing up to the International Health Regulations, and any Treaty with the World Health Organisation. We have our own experts in Australia and although to date they've proven underwhelming, and appear to be captured by pharmaceutical interests, we at least have the ability to vote in, or out our own so called 'experts' in this country, as such it is a firm NO to any treaty as this will simply allow the Australian Government to shift blame and have no accountability for their actions.
12. As a taxpayer of this country, I demand an investigation into the rise in all-cause mortality since the rollout of the MRNA vaccinations and lockdowns.
13. The Governments intentions should be analysed for only giving the people of Australia 7 days to complete this submission. Considering the long-term effects of the Covid response, which will severely affect the health of the Australians who were injected with this experimental vaccine and for their offspring and generations to come. I have had to submit this with less detail than I would have liked, due to the obvious time constraints this Government has imposed. I demand nothing less than a Royal Commission into the Covid 19 response.
