

I worked as a support worker in the community helping the aged and people with disabilities. I lost my job, even though the government knew that the vaccines do not stop transmission of the virus. Not only has that affected us financially and emotionally but the people that I cared for have lost their support with someone that they relied on and trust. I have received phone calls from my clients crying because they can not get the help they desperately need. They also could not understand why I was not allowed to work. It was okay to work all through 2020 and up to October 2021 and then I was not allowed to work. To this day I still haven't had Covid-19. We also missed out attending our [REDACTED] wedding because of border closures.

We need a thorough inquiry and Royal Commission into the handling of the pandemic.

- Secret contracts
- Border closures
- Mask mandates – which cause bacteria pneumonia
- Lock downs
- Vaccine mandates
- Lies in the media
- Official misinformation
- Vaccines to block transmission
- Media censorship
- VACCINE INJURIES - poor treatment of victims
- Increase in death (since the vaccine and not covid)
- Silencing of doctors
- The role of AHPRA and ATAGI in censorship and oppression of doctors
- The role of TGA (not testing the vaccine)
- School closures

We must have a thorough inquiry and Royal Commission so that future pandemics can be handled with as minimal government overreach as possible. Mistakes made during these past few years should never be made again.
