

I am submitting this in as a concerned citizen who is disillusioned with that state of government decision making, industry regulation, and the pharmaceutical industry. Covid has certainly focused a bright light on this area.

The pharmacy vaccine immunity preventing people who have been harmed by the covid vaccine to take legal action against the pharmaceutical company is wrong. It allows the pharmaceutical industry to not thoroughly test to ensure that their vaccines are both safe and effective. See the Daily Clout Investigative reports detailing the Pfizer and Moderna Clinical trial data highlighting how the trial report information was suppressed, modified, and hidden from the public. Please see Daily Clout Reports 1 to 93. Pfizer and Moderna Reports Archives - DailyClout

Australians should be able to take legal action against pharmaceutical companies that DO NOT take the utmost care in the development and production of their products and withhold key information from the public. The Australian public were mandated to take this vaccine (my husband lost his job). Our entire family was severely affected by poor government policy. It did not need to be this way. The pharmaceutical clinical trial reports shows evidence that the product was unsafe and ineffective, and had the Australian authorities demanded access to this data – the approval of these vaccines would not have been given. [Pfizer's Documents: Public Health and Medical Professionals for Transparency Documents 11/2023 - ICAN - Informed Consent Action Network \(icandecide.org\)](#)

The last Pfizer clinical trial data information report was released in November 2023 by the USA FDA to the public under FOI more than 800 days after the FDA agency approved the Covid Vaccine. (For vaccines ages 16 and up). This information should have been viewed by the Australian Vaccine approvers (ATAGI / TGA) prior to providing the covid 19 vaccine approval. Final Batch of Pfizer Documents for Ages 16+ (According to FDA) Finally Released to the Public - ICAN - Informed Consent Action Network (icandecide.org)

Natural Immunity was ignored. Natural immunity has minimal side effects. Healthy young people do not die of covid. They do suffer long term side effects and death from pericarditis and myocarditis caused by the vaccines. “ Thai research indicates as many as **one in three teenagers** suffer from [heart-related problems](#) following mRNA vaccination.”

Western Australia health authority data shows we are killing 5 people for every person we might save if the vaccine worked (which it doesn't)

“How could anyone not notice this? In 2021, there were 0 deaths reported for all other vaccines combined but 87 reported for the COVID vaccine. That's not "bad luck." That's a disaster.”

It is hard to take this COVID-19 Response Inquiry seriously when such short timeframes have been given to respond and only 3 page submissions are allowed. This does not allow for the huge volume of issues that need to be presented and documented
