

Submission to the Australian Government
Australian Government
Department of the Prime Minister and Cabinet

11 December 2023

Submission: COVID-19 Response Inquiry

To introduce myself, I am [REDACTED] [REDACTED] I reside in Central Queensland [REDACTED] and have lived and worked in this area since 1991. I am employed as a Work Health & Safety Specialist. This has been my main vocation for the thirty plus years I have worked in construction, mineral processing, logistics and service industries in the region. During that time, I have worked for a number of major employers such as Bechtel, Rio Tinto, Gladstone Ports Corporation, Downer Engineering, UGL and Cement Australia.

Over the last three and a half years I have closely observed/scrutinized both government and medical recommendations as they pertain to the COVID "Pandemic." For many years I have had a deep interest in personal health as it pertains to healthy eating, use of supplements and healthy lifestyle. Early in the "pandemic" I was alerted to the fact that the recommended/prescribed protocols were ineffective and even dangerous. The use of ventilators and drugs like Remdesivir are examples of those protocols [Can remdesivir cause kidney failure? How so and alternatives \(medicalnewstoday.com\)](#). Early treatment was suppressed [Outcomes after Early Treatment with Hydroxychloroquine and Azithromycin: An Analysis of 30,423 COVID-19 patients \(substack.com\)](#). Doctors were threatened if they attempted to prescribe off label medicines and early treatments [IVERMECTIN DECISION – TGA INCOMPETENCE HAS COST LIVES \(substack.com\)](#). A small number of medical professionals (worldwide) were brave enough to speak out against the mandates and the government sponsored/recommended health protocols. This group were labelled the "disinformation dozen." I must point out that several brave Australian medical practitioners also spoke out. Sadly, some that I know have found themselves marginalized and their careers in tatters.

[Majority of Covid misinformation came from 12 people, report finds | Coronavirus | The Guardian](#)

Fortunately, I followed the advice of these types of breakaway professionals who were treated much like Galileo when he was confronted by the church over his views regarding the earth's orbit.

I now find that I have waded through this crisis with my health intact but my view of big government, corporations and the medical profession completely upturned.

I now note on a daily basis that the so called "safe and effective" and "recommended" government pushed & sponsored health protocols are having a tragic effect on those who subscribed to this narrative.

There are innumerable studies coming to light that show a great many diseases are being spawned by the so called "vaccines" [SC Senate Hearing - Dr. Janci Lindsay - YouTube](#) ; [BABIES who died after Pfizer or Moderna COVID-19 mRNA Vaccine, Flu Vaccine, or died from SIDS - 25 Baby deaths presented \(age 0-2\) \(viewer discretion advised\) \(substack.com\)](#) ; [SUMMER OF DIED SUDDENLY - Men ages 20-29: Sudden deaths from June to Oct 2023 - 76 Tragic deaths - What is killing young COVID-19 Vaccinated men? \(substack.com\)](#)

I feel compelled to judge any future actions and powers that our government may bestow upon itself with the recent failures and coverups of the past.

As a work health and safety professional I found myself confronted with health issues from colleagues who informed me that they were suffering from “vaccine” related injuries. Some individuals explained that these “vaccine” injuries were also confirmed by their health professionals. Most of these “vaccine” injuries have likely gone unreported through our TGA DAEN reporting system.

It is for this reason I wrote as a 25-year WH&S professional to both Safe Work Australia as well as their Queensland counterpart WorkSafe Qld. I advised the regulatory bodies that in my opinion they are required to investigate COVID-19 vaccine adverse reactions/injuries as they relate to the Australian workforce due to the fact that these protocols were both mandated and promoted by businesses. [Incident notification fact sheet \(safeworkaustralia.gov.au\)](https://safeworkaustralia.gov.au). Noting that it is a serious offence not to report any event/incident where a worker has suffered a serious injury/illness. The adverse reactions which are now documented for all to see pose a real risk to the work force going forward.

These regulatory bodies decided not to investigate my reports and concerns other than supplying me with a legalistic reply which left me totally disgusted with their lack of independent enquiry.

It must be remembered that throughout this “pandemic” the rarest commodity has been the truth. We are still witnessing (December 2023) so called experts argue over the origins of COVID-19. Some of Australia’s leading medical/pharmacology experts have written reports such as the Altman report which highlight key issues with the handling of the “pandemic” and highlight the dangers involved in rolling out experimental medical treatments. Leading medical professors from the University of Queensland (e.g., Professor Wendy Hoy) have been outspoken about the dangerous health protocols forced on to the public by Government and Corporate sponsors.

The Australian government (regardless of whether it is State or Commonwealth) has proven that it has an agenda to grab power and fall under the influence of corporations and pressure groups who do not have the interests of the public at heart. Unfortunately, some of us are acutely aware that history will judge this era harshly.

Corruption – How Can We Trust Our Own Government?

Where I am at odds is where government attempts to investigate its own machinations and potential corruption. If one searches on the internet one can find some of the most damning news articles (see below) relating to both major parties and the influence of major corporations (pre-dating COVID-19). One article alleges that Australian Government accepted eye watering amounts of money from lobbyists at Party run BBQs in order to sidestep having to show those donations on the books. All these big money transactions must have played a major part in the path the government took when confronted with this so called “pandemic”. I believe this corruption is closely related to the root cause of the problem.

Who appointed the Royal Commission Commissioners, in other words how truly independent are these representatives?
