

Submission to Commonwealth Government COVID-19 Response Inquiry

I call for a Royal Commission in the pandemic response at state and federal levels.

Abandoning the already established protocols from a previous government was a decision that needs to be clarified and made public. Mandating vaccinations and lockdowns and politicising the police force needs to be investigated and repudiated.

Only the truth will set us free.

Do not set up a whitewashing “inquiry” panel that is run by the same people who orchestrated this governance debacle.
