

Statement of complaint and protest regarding the Covid response in Australia

I strongly protest the approaches both Federal and State governments took and the measures they inflicted on the Australian populace in the name of a Covid pandemic. They abused our human rights to bodily autonomy, freedom of speech, assembly, movement, association, and employment. They incurred exorbitant debts and allowed China to profit from the production of ludicrous amounts of 'hygiene' paraphernalia. They damaged business, industry, and supply lines with lockdowns and vax mandates, and forced many people out of their jobs and hence their homes. Much wealth flowed to large corporations at the expense of small to medium businesses, financially harming many 'middle class' Australians who continue to suffer with resulting high cost of living. I consider that a crime of massive proportions has been perpetrated upon the Australian people, not only against our human rights and financial wellbeing, but also against our health, physical and mental. Safe effective drugs like HCQ and IVM were banned and the government worked with mainstream media to terrify the public with propaganda and threats. Disastrous health results from the toxic components of the Covid vaccines continue and increase, and I fear for the longterm health of family members and friends who succumbed to the abusive government campaign. I will never forget or forgive the evil acts forced upon us, and insist that a proper independent enquiry be made to restore justice by prosecuting the culprits.

Dr Deborah Hurn, 11/12/23
