

Australian Federal Government 2023 COVID-19 Response Inquiry.

Inquiry's Terms of Reference this submission will address.

- Key health response measures (for example across COVID-19 vaccinations and treatments, key medical supplies such as personal protective equipment, quarantine facilities, and public health messaging).
- Broader health supports for people impacted by COVID-19 and/or lockdowns (for example mental health and suicide prevention supports, and access to screening and other preventive health measures).

To whom it may concern, my name is Wayne Spyve. I am a previous registered nurse who has retrained as a secondary school teacher. I live in [REDACTED]

The following points I raise have created intense mistrust within a large portion of the Australian population. It is believed that the Federal Government had or has the ability to influence and / or change these things. Although I have not backed these points up with referencing from the public domain, they remain constant as unanswered questions which continue to cause unrest and mistrust.

1. Untested new technology mRNA gene therapy touted as being a "Safe and Effective Vaccine" was rolled out and mandated across the entire population – this was wrong.
2. Politicians were not required to be vaccinated despite mandatory vaccination policy for the general population – this was wrong.
3. APHRA intimidation of those registered by them, censoring and deplatforming any professional person registered by them who was wishing to speak anything other than the "government sanctioned narrative" – this was wrong.
4. My previously healthy, happy mother ([REDACTED]) died in a nursing home within 10 days of her third mandated covid19 vaccination (1st Booster). There was no investigation - this was wrong.
5. The attending Doctor was requested by me to submit her ([REDACTED]) death to TGA. After refusing to talk about it with me, I submitted it myself – this was wrong that he would feel intimidated by APHRA and unable to do this.
6. Use of existing safe medications (Ivermectin, Hydroxychloroquine) for those "At Risk" for vaccination or those choosing not to be injected, was disallowed – this was wrong.
7. Social media black-out and censoring of any dissenting conversations (to the official narrative) on platforms within the Australian media-sphere – this was wrong.
8. Federal Politicians that refused to show up and engage with a hundred thousand people (plus) from their own electorates across Australia, all protesting the massive impost and over-reach of these same politicians. This occurred on February 12, 2022 on the "Common" lawn between the old parliament house and new parliament house lawn – politicians not showing up and speaking up, was wrong.
9. Federal Government disinterest into reasons for dramatic increase in "All Cause Mortality" within Australia since the mass vaccination program has not been forthcoming – this is wrong.

Regards
Wayne Spyve
