

Dear members of Parliament.

I hearby wish to submit my topics into the Covid-19 enquiry as I believe the Australian public have been truly whitewashed by the former and now Current governments.

The points are as follows:

1- Nothing LESS than a FULL royal commission into the framework of the determining of the rollout of Covid-19 vaccines.

2- Within the Royal Commission is also to fully investigate why members of Parliament were given the option to abstain from receiving the Covid-19 vaccines WITHOUT prejudice.

3- Make ALL contracts with Big Pharma & Australian government public and transparent that were deemed secret.

4- Make ALL vaccine mandates ILLEGAL, Nationally, and rescind ALL records against those who have lost jobs or businesses.

5- The use of Government bodies to promote unfair and untruthful information against vaccines that had previously worked but were deemed illegal by Australian health regulatories falsely providing CORRECT important information for them to make an INDIVIDUAL INFORMED opinion.

6- The silencing, censorship and suspension of fully qualified medical practitioners by ATAGI (who are made up if UNQUALIFIED MEDICAL personnel) while attempting to provide medical exemptions to patients who were examined to be 'At Risk' from the vaccine injection.

7- The coercion by state government health departments to enforce federal vaccine mandates under the guise of safety also needs to be investigated.

8- The use of Mainstream media to enforce state health coercion and instill fear in members of the public.

This was a farce from Day one and a lot of people have either suffered medically, financially or sadly - fatally because of incorrect information peddles to the Australian public.

I sincerely hope a FULL ROYAL COMMISSION into the Covid-19 episodes exposes alot of wrongdoing to the Australian public.

Sincerely

██████████
