

To Whom it may concern

This is my submission on how the covid crisis has impacted my life personally.

My employment was negatively impacted because I chose not participate, in a vaccine that I felt was not yet adequately tested. My employer mandated that all employees had to be fully vaccinated by February 2021. I feel the government failed to protect my freedom of medical choice and privacy by failing to enact anti discrimination legislation to protect my freedom of choice, bodily autonomy and medical privacy.

With all peer reviewed data now widely available, I feel I made the correct decision. I feel my government failed me terribly.
