

Colin Trott Dec 15 2023

Due to the governments mishandling of the Covid 19 pandemic, I am submitting my attached letter, 'The Vax Mandate Killed My [REDACTED]' to anyone that may have the courage to bring this tragedy to the attention of all Australian citizens, politicians and in particular the Victorian State Government.

The last time humankind was vaccinated against their will and mandated en-mass was in 1943 Nazi Germany. The governments mishandling of the C19 pandemic included having no-one and no-where online or phone, to state this case or submit to. The Vaccine Claims Scheme does not allow for death caused by vaccine because the first thing that accompanies your claim has to be a statement from the jab issuing doctor that they were wrong and made a mistake.

As if they will do that not knowing what's in it and having been granted total indemnity by the Vic. government.

There is no provision for me to be acknowledged or heard because of the litigation that would follow should my [REDACTED] Truth be an admission of fault by the government, the doctor, the vaccine. As one legal professional put it to me, "Getting the government and the doc to literally accept responsibility and blame for your [REDACTED] death would be an absolute miracle". Even though it is the truth.

Those that didn't lose their beloved during the pandemic, have already forgotten about Covid19 and the murderous mandate.

The Vax Mandate Killed My [REDACTED]

At the height of the Covid 19 pandemic about May/ June 2021, [REDACTED] my [REDACTED] [REDACTED] was advised by her employer to get vaccinated (no jab, no job) She went to get her AstraZeneca jab as a part of the Victorian government's vaccine mandate. I told her to make sure and tell the doctor of her medical history of [REDACTED] issues including the time she was hospitalised with [REDACTED] and [REDACTED] which she said she did. I told her to make sure she got either an exemption or Pfizer as the AstraZeneca dose was linked to [REDACTED] and [REDACTED]

She came home after seeing the doctor ([REDACTED]) and said she didn't feel well. She then told me she was administered the AstraZeneca vaccine as there were no exemptions and because of her age [REDACTED] it would have to be AstraZeneca. I asked her if she told the doctor about her history, and she said yes but he assured her that it was safe. She never fully recovered from this first jab. Myself and family members noticed her waning condition and her laboured movement, she tested negative to covid. She had to sleep in a sitting up position to be comfortable. In September she had a covid test which proved again, negative.

The no jab no job policy came about, and the Victorian government required everyone to be double vaccinated [REDACTED] work place called her and told her to get her next jab as they may soon be required to return to the office. [REDACTED] made the appointment as she worked for kids from dysfunctional families and the courts. It was a particular and important area that relied on her expertise, she wasn't going to let the kids down. I begged her not to go to the same doctor or get the same shot (AstraZeneca) as she was still sick from the first dose. I told her to quit work, I said I would go with her, but despite my efforts she went and had the second jab at the same place with the same [REDACTED] doctor who said she would be fine.

██████ had her first ██████ 2 days later. She was rushed to hospital ██████ where she had another ██████. She was placed on a ██████ for the next 3 days (NOT COVID RELATED).

She began to recover for approx. six days, able to speak but ██████. As I was making arrangements to bring her to the ██████ where I work, I was told to come in as she had a ██████ in her ██████, apparently ██████ and ██████. I then watched my ██████ for ██████.

In conclusion, it is my belief that the vaccine mandate, the rule of no exemption and an ██████ doctor have caused my ██████ death. AstraZeneca within a low blood plate count that signifies causality are hard to find in arterial area's like the brainstem. According to several doctors these are found mainly in veins not arteries. The death summary highlights all of the conditions ██████ had, ticking every box for a reaction to AstraZeneca. We were told her ██████ was normal, AstraZeneca not responsible. The death summary clearly shows her ██████ was at times very low and at other times very high. I was told later that the doctor who did the death summary made mistakes. No doctor would sign anything.

In the process of submitting a record of circumstances that led to ██████ death to the government, I had to fill in 3 forms namely an MO062, MO063 and an MO064. The MO063 (doctors form) is laughable as it requires a doctors signature admitting blame and AstraZeneca responsible for ██████ death. No doctor or person would sign a document condemning themselves. Promising anonymity, i asked several doctors (hypothetically, and unaware of the outcome) what would they do if ██████ and her past med history presented to them. None of them would have administered AstraZeneca...None! As it was already condemned in many countries throughout the world.

As two doctors said to me. "The timeline is too close to be unrelated".adding that " it would be harder to prove that it wasn't the cause".

Sincerely

Colin Alexander Trott
