

[REDACTED]

[REDACTED]

15/12/2023

Dear Committee Members

I'm a qualified teacher of [REDACTED] years and completed a Bachelor of Education Primary. My role at the [REDACTED] was a specialist role in [REDACTED] Arts/[REDACTED] Arts. I was teaching through most of the pandemic until the mandates started to roll out. I worked in [REDACTED], the most locked down and the most bullied region in [REDACTED]. I chose not to reveal my private medical information to [REDACTED] my employer, as it is illegal to do so, I was bullied every week by Human Resources to provide this information and threatened with job loss through termination. I did not provide my private medical information and because of this, I was terminated from my role as a specialist [REDACTED] arts/[REDACTED] arts teacher effective [REDACTED] [REDACTED] 2022. I would attach the letter of termination but as it is confidential it will not be attached as evidence. Additionally,

I was teacher capacity building and programming across several [REDACTED] primary schools and high schools, as well as, filling in the gaps of many absent teachers during the peak of the pandemic as I was fit and healthy to do so. Eventually, when the government decided to mandate covid 19 vaccines based on zero science I was left without a job and a severe loss of income for several months. During this time I was unable to provide for my family, seeking assistance and help from fellow good Australian citizens, as the government also cut off income access from me due to these mandates.

Addressing terms of reference

- Broader health supports for people impacted by COVID-19 and/or lockdowns (for example mental health and suicide prevention supports, and access to screening and other preventive health measures).
- Governance including the role of the Commonwealth Government, responsibilities of state and territory governments, national governance mechanisms (such as National Cabinet, the National Coordination Mechanism and the Australian Health Protection Principal Committee) and advisory bodies supporting responses to COVID-19.
- Mechanisms to better target future responses to the needs of particular populations (including across genders, age groups, socio-economic status, geographic location, people with disability, First Nations peoples and communities and people from culturally and linguistically diverse communities).

In the future a national cabinet should never be formed again, we are one nation and a competent government and round table of medical specialists in the fields of the medical emergency should consolidate and be able to debate and make future decisions in a medical emergency. No Government overreach into each individual's rights to make a medical decision. No international interference for the Australian government to make its own decisions for its nation as we should remain a sovereign country and address the needs of the people of this nation. There needs to be full transparency to the public citizens of Australia regarding the dealings between pharmaceutical contracts and medical decisions or dealings made by the government. There needs to be a royal commission into government-enforced lockdowns, mass mandates, media censorship, silencing of doctors, as well as AHPRA and ATAGI censorship and oppression of doctors. The government should never get involved in a Doctor/Patient relationship, as individual medical issues/records need to remain confidential and private information. More importantly, the role of many politicians and media outlets that falsely claimed the ability of vaccines to block transmission should be investigated and should never be allowed to be broadcasted or voiced. This caused mass discrimination, abuse and unrest amongst many Australians. The science needs to come first and allow for open debate.

Addressing terms of reference

- Support for industry and businesses (for example responding to supply chain and transport issues, addressing labour shortages, and support for specific industries).
- Financial support for individuals (including income support payments).

If the government is going to stop thousands of citizens who make their own medical decisions and choices based on their health from acquiring an income from employment, then the government needs to substitute their loss of income. A royal commission into the thousands of healthy citizens that had lost their jobs and income to support their families including my own needs to be held and the need for these thousands of people who lost income during this time needs to be compensated.

Yours sincerely,

A solid black rectangular box used to redact the signature of the sender.
