

Covid Enquiry December 2023 – Response

1. Invalidity of the Enquiry – the members of the enquiry should resign and call for a fully established Royal Commission into the entire period of the pandemic up to and including the current time. This is the only valid response to what amounts to an intentional cover-up by the Federal Government of this country, considering the immense and ongoing damage done to public health, people's economic lives and wellbeing, the nature of our democracy and the suspension of legal rights during the emergency phase and the further attempts to constrain the return of human rights in order to continue a process of governance that is perhaps best described as criminal malfeasance by large sections of the bureaucracy and of many elected parliamentarians.
2. The Gross Distortion of Medical Practice – it is clear from evidence now available in the public sphere (despite ongoing attempts by governments, mass media, bureaucracies and significant members of transnational and national corporations to suppress, that proper and long established (going back to Hippocrates) universally accepted medical ethics and practices (“Do no harm”) have been usurped and perverted to advance the interests of some elected and non-elected officials including those in WHO and various Australian bodies through their links to ‘Big Pharma’. The corruption evident through many practices invoked by so-called leaders including lockdowns, masking, social distancing and ‘vaccination’ including mandates have little, if any basis in medical evidence and were designed to exacerbate fear and hence compliance in the population to political ends that make a mockery of medical care and proper practice. Evidence including the falsification of testing through the PCR standards that were applied that further charged the atmosphere of panic and which were known through statements made by the [REDACTED] prior to the ‘outbreak’ lead to wildly exaggerated claims which caused a “casedemic” and not a pandemic. The suppression of frontline doctors working in life threatening situations to find appropriate treatments and off-label drug prescriptions prior to the ‘vaccine’ release and the subsequent lies used to pull many of those drugs out of prescription (ivermectin, hydroxychloroquine, etc – though many like budesonide continued in use) despite their demonstrated efficacy. The outrageous suppression to life threatening levels of people in their homes such as the infamous Victorian twin towers lockdown which was eventually settled out of court to avoid further embarrassment for the exiting premier Andrews. The disastrous lockdown of schools despite it being known from quite early on that children and young people were at little risk and the disgraceful scare campaign which suggested they may infect and kill their grandparents for example, should they be exempted from ‘vaccines’ etc. There are too many examples to list here but the record is full of them. Worst of all was the failure of the so-called vaccines and the damage they have done and continue to do (excess deaths, etc) and the complete denial by authorities of any exposure of the appalling truth about these toxins. Witness for example, the revelations from the US Michigan court which ordered release of Pfizer documents over the past two years which [REDACTED]
[REDACTED]

[REDACTED]

Yet Pfizer and authorities went on to recommend 'vaccination' for pregnant women! Consider the recent revelations from [REDACTED] a highly rated specialist in genetic microbiology [REDACTED]. His work has been corroborated by other experts around the world including [REDACTED] and yet authorities in this country continue to back both Pfizer and Moderna (including investing \$100million into the production of more mRNA 'vaccines' in this country).

3. Malfeasance in government – apart from examples already provided the complete disregard for human life (whilst pretending to be so concerned for 'safety') the governments of this country exhibit, they continue to ignore confounding evidence of massive scale coming from not just doctors and medical researchers (many of whom have world class careers and, prior to this fiasco, outstanding records of practice and achievement – now trashed behind the scenes by bureaucracies and such) but also many within their own ranks who whistle-blew. The likes of AHPRA, TGA, ATAGI and others, replicated in corporately captured institutions globally (don't forget that TGA is around [REDACTED] by 'Big Pharma') continue to push their lies as one by one the individuals fade from view (to avoid the inevitable prosecutions?) [REDACTED] has gone from the US FDA/NIAIDS etc, [REDACTED] (with their cheersquads intact), and the list goes on: "nothing left in the tank". But now in New Zealand, one honest man (an unknown database administrator) has revealed the truth for the first time in history. [REDACTED] gave warning to his superiors including those in the new government (post Ardern) that he had witnessed a safety signal in their vaccination data. When they refused to make it public (breaking an election promise) and to address it and instead cut him off, he released it globally and it is now sending shockwaves around the world. To reiterate, this is primary source data showing massive rates of death from vaccination – way beyond anything seen in history and something which respected researchers have been calling for, for years (such as associate editor of the [REDACTED]). The response of the NZ authorities – blame the whistleblower, send armed police to his home, arrest him and accuse him of criminal activity! He gave warning and his warning was based on his simple assessment that the data belongs to the people and when there are such serious warnings in it – it must be made public. The response of government (and it is the response of governments across many countries) it seems, is deny and cover up.
4. And this is exactly what you Enquirers are doing, covering up for the current and the previous governments which have failed and continue to fail their people by not investigating transparently, honestly all the real evidence and seeking to make amends including charging, trying and punishing those who have perpetrated these crimes against humanity. Latest research including this from NZ suggest at least 10 million and anything up to 20 million deaths worldwide from the

- ‘vaccines’. The criminality of Big Pharma and their agents in the health bureaucracies must be investigated. The evidence is now too great.
5. The TRUTH WILL OUT. You Enquirers need to do the right thing and resign, calling for a full Royal Commission – that is the only thing that will save those who have done wrong but who realize their wrongdoing and seek to make amends. Do you have a conscience or will you remain within your elite clique, living a life of pretence and personal advantage?

Thank you for your consideration....
