

Australian COVID-19 Inquiry:

"The most dangerous, deadly and transmissible disease ever known to mankind"

Average age of death in Australian increased by 5 years from 80 to 85 during COVID years.

My Father, deceased, who had [REDACTED] aged [REDACTED] in March 2020, caught the original strain of COVID and was not in any medical trouble whatsoever other than being locked up in a hospital room and treated worse than a convict, i.e. not even being allowed into the fresh air for 12 days. This undoubtedly caused more harm to him than any respiratory disease would have.

I was unable to travel to [REDACTED] to see my mother and so she was isolated for over 2 years from her [REDACTED] sons.

I lost my job for not getting the mandated / coerced / forced (yes it was forced, with threats of million-dollar fines for businesses) job, I was bullied, harassed, and discriminated against because of what Daniel Andrews stated as "fact" when in fact he lied to us about, not only the safety and efficiency of the vaccination but its effect on transmission.

My family have all gotten COVID the same amount times as they were jabbed, however I have never caught it and lived with my brother when he was symptomatic twice, how is this possible when we were told what we were told by the government? You lied to us all...

- Australia already had a pandemic response prepared that cost millions to produce, why did we not follow this? i.e. Protect the vulnerable and let everyone else do their thing.
- Why aren't the decisions of state premiers being considered in this enquiry? This is egregious and shows the incompetence of the Australian government or willingness to hide facts to protect people within government.
- Why were state premiers allowed to enact unlawful, non-medical based decisions on the public without having to show the public the actual data and evidence? With differences in each state? This showed it had nothing to do with "science", another word sullied by state and federal governments in Australia.
- How is it possible that people were allowed to be discriminated against in Australia in 2020, 2021, 2022 and still in 2023 based off of a medical decision which has nothing to do with where you work? Especially when its common knowledge that vaccines do not protect anyone else apart from the person who took it? This must extend to all health workers as well.
- Why did you allow natural immunity to be demonized as being useless against a respiratory disease compared to an untested drug? The best protection from sickness and disease has always / and will always continue to be natural immunity for the majority of people.
- Why were known treatments and even vitamin D, dismissed and not discussed as alternative measures to taking a synthetically man-made drug?
- Why did the government buy enough doses for 10 shots for each person in Australia?
- Why has critical information regarding the vaccination been hidden, redacted, or simply not been bought into the public domain?
- Lockdowns were imbecilic, based on nothing other than polling, unwarranted, and has completely wrecked the country's economy, (which anyone could see would happen) and in particular children's education, had absolutely nothing to do with individuals or individuals doctors or common sense knowledge of how we protect ourselves against a respiratory

disease like influenza every year, and is the reason why we are in such a sorry state and again, "I can't recall" is an acceptable answer from a premier?

- Vaccine mandates go against everything we hold sacred in terms of medical autonomy and basic human rights, how was it allowed that these unalienable rights were denied to people by state premiers? Mandating any medicine is clearly ethically wrong, especially when all medicines have side effects that are unknown to an individual.
- Why have the origins of covid not being disclosed?
- Why has Daniel Andrews been allowed to just walk away? With a \$300K a year pension?
- Why is no one being held accountable for any of their decisions? Including, the not-elected by anyone Brett Sutton?
- Why is the government still not accepting that the vaccine has caused harm and death in a lot of people across the globe as well as in Australia. You were still pushing it in October 2023!!! Where is the accountability? Where is your empathy for the people that your decisions harmed and you are meant to serve?
- Why hasn't anyone apologized to everyone who lost their job based off of a medical lie sold to us by big corporations who did not disclose test results properly and then made billions of dollars profit off of the back of taxpayers' money? Where is the refund for taxpayers?
- How was anyone allowed to profit off of a so-called public health emergency?
- Why does any medical provider have indemnity? This implies that their profits will be protected no matter their drugs negative effects and should be classed as businesses not medical institutions. AND NEVER TRUSTED BY GOVERNMENTS AGAIN.
- Disband the TGA and ATAGI – They are clearly bought and paid for by big pharma.
- Stop the transmission of government officials entering into medical corporate jobs when they have / or are receiving a taxpayer funded pension.
- Have a ROYAL commission into COVID.
- GOVERNMENT MUST NEVER BE ALLOWED TO REPEAT ANY OF THE OVER-REACH THAT OCCURED DURING COVID.
- I WILL NEVER VOTE AGAIN AS DEMOCRACY IN THIS COUNTRY IS DEAD AND GONE. NO PARTY CAN BE TRUSTED AS YOU HAVE ALL BEEN CLEARLY BOUGHT AND PAID FOR BY BIG CORPORATIONS. CASE AND POINT, THE VOICE. ANOTHER TRAVESTY.
- STOP THE CLIMATE NONSENSE. EVEN IF WE ALL DISAPPEARED OVERNIGHT IT WOULDN'T CHANGE A THING. YOU'RE HURTING EVERYDAY AUSSIES.
- THE GOVERNMENT NEEDS TO RELEARN ITS PLACE, YOU SERVE US! LEAVE US ALONE TO LIVE OUR LIVES.
