

To the panel,

I am requesting a full royal commission for a proper and thorough investigation into the Govt's declaration of Australia's involvement in the Covid 19 pandemic and all its extreme measures.

Investigations include:

Evidence that a so called covid 19 virus has ever been isolated in a laboratory. And proof that any alleged contagious pathogens are nothing more than Exosomes that are produced and released within the body to perform a cleansing, purging or detoxification of cellular and toxic wastes triggering a host of flu like symptoms that the medical industry refers to as a common cold.

Without this evidence all actions taken by the federal and state govt's were all based on hearsay, conjecture and deceit, proclaimed by a non elected private corporation. All vaccine mandates and all lockdowns and restrictions then were crimes against the Australian people.

Vaccine procurement and secret vaccine contracts.

Vaccine mandates.

Mask mandates and lockdowns.

Forced closures of businesses.

Government mis/disinformation in the media regarding the safety of vaccines and denial of vaccine injuries and gaslighting of the injured.

AHPRA and ATAGI's actions to silence the medical profession and target individuals going against the medical narrative. And their lack of due diligence on the safety and adverse reactions of vaccines.

Regards
