

Commonwealth Government Covid-19 response inquiry

Submission by [REDACTED] and [REDACTED]

It is firstly important to raise two concerns about this inquiry process:

1. The actions of the state governments should be considered as they played a major role during covid and this inquiry is meaningless without including the states' responses.
2. The limited time frame that has been given to allow for interested parties to prepare.

National Cabinet

- The national cabinet is not a constitutional recognised body.
- Information relating to decisions made by national cabinet should have been made available to the public.

Public Health Messaging

- Censorship of health messaging that presented an alternate view to that of the government.
- AHPRA's harassment and censorship of medical practitioners.
- Overstating safety and efficacy of vaccines.
- Questionable and unrelenting presentation of data relating to covid cases and deaths to invoke fear.
- Use of celebrity to sell government message at tax payer expense. A true pandemic does not need to be sold to the public.
- Inaccurate messaging that the pandemic was a 'pandemic of the unvaccinated'.
- Promoting vaccines as the only treatment.
- Mask mandates despite no supporting evidence, however evidence existed to suggest they are harmful, especially for a developing child.
- Using inaccurate advice from unelected globalists entities such as WHO, WEF and UN, who should not have any power over Australians, ever.

Cost of lockdowns

- Evidence shows lockdowns caused more harm than good, far outweighing any perceived benefits. Harms included job losses, financial ruin, increases in drug and alcohol consumption, family violence, family breakdowns and mental and physical illness.

- School children were denied face to face schooling and social interactions.
- Border closures cut people off from medical care and isolated families from loved ones.
- Our own personal impact was the inability to attend my father's funeral or see him in the last days of his life to say goodbye which is something I will have to live with forever.

Vaccine Mandates

- Suppression of existing treatments in order to allow emergency approval of an experimental drug, which was then mandated while still in the experimental phase. This is an abhorrent human rights violation.
- The covid-19 "vaccines" do not constitute as a vaccine, rather they are a gene therapy, so should have been labelled as such.
- Vaccine mandates cost many people their job and livelihood, despite no evidence that they would realistically stop the spread of covid-19.

Supports

- Failure to acknowledge people who have been harmed by covid-19 "vaccines".
- Failure to issue exemptions to people who are at high risk of an adverse reaction and for those who have had an initial vaccine adverse reaction.
- Difficulty in acquiring compensation for people suffering vaccine injury.
- Indemnity given to pharmaceutical companies has resulted in their indifference to vaccine injured people.
- No informed consent given. Ingredients of vaccine was shrouded in secrecy.

Hospital Treatments

- Ineffective and dangerous treatment protocols used.
- Ineffective and harmful mask mandates were enforced.
- Suppression of safe alternate medications.
- Inaccurate PCR testing used as a diagnostic tool even on people with no symptoms and in hospital for totally unrelated issues.

- Failure to promote healthy practices such as sunlight exposure, fresh air, good nutrition, exercise, social interaction.

Excessive force and exclusion

- Government use of police force to enforce (at times violently) draconian rules.
- Exclusion from movement and attendance at particular services, places and venues unless able to show a “vaccine” certificate even though it does not stop transmission. It was very reminiscent of another period people had to show their papers.
- Shut down of public spaces such as parks and beaches which provide people with healthy lifestyle facilities even though outdoor transmission was miniscule.

Conclusion

This submission would include many other items, the covid-19 era is truly a whole book of government errors and draconian responses and violations of human rights, however the time frame given to prepare submissions was inadequate and did not allow for a more detailed response. This time will be talked about in the future as one of the most despotic in history. We need to learn from this time and never again impose such inhumane actions on our people. The outcome for this inquiry must result in accountability and criminal investigations, including state governments, for those who have harmed and violated basic human rights.
