

SUBMISSION FOR COVID 19 ENQUIRY

I am a partner in a small business in the building industry and mother of [REDACTED] [REDACTED]. I was appalled at the extreme measures and mandates imposed on the population during the so-called Covid 19 pandemic. I call for a proper Royal Commission into a number of things that impacted me and my family directly and others, and other acts by government that were clearly against the Universal Declaration of Human Rights:

[REDACTED] were manipulated into receiving experimental vaccinations, without full consent and knowledge of any side effects. One was wanting to travel overseas and could not do so unless vaccinated. The other wanted to merely go out to licenced bars or restaurants as she was single. They were constantly told through the media and by government information that they were safe and effective, when in fact it is now proven that they were not tested thoroughly, both either in Australia by the TGA or by their manufacturers. After her injections my [REDACTED] had [REDACTED] [REDACTED] and she thought she was going to die. She also [REDACTED], as well as her vaccinated partner, and was tested positive for Covid 19.

Myself and my [REDACTED] did not get the injections and so were banned to going to many venues because of this, even though we were well and healthy. My [REDACTED] lost the ability to quote on some jobs as some potential clients asked if he was vaccinated, which he was not. Some were scared they may be infected even though he was well and healthy. Masks were mandated to be worn in certain places and there was no scientific proof that they actually worked. Politicians made unfounded and scaremongering statements, including that "the virus would hunt you down" if you were unvaccinated. And that hospitals would be full and overwhelmed with the unvaccinated. They did everything to coerce and scare everyone to getting this injection. Yet [REDACTED] [REDACTED] said himself that "the world is undergoing the biggest trial in history".

We were later to learn that ATAGI and AHPRA were directly responsible for gagging doctors who questioned the safety or effects of these "vaccinations". Doctors and medical professionals were the people whom we have come to totally trust with our health. And so for the govt to gag and suppress these

medical professionals views and observations on the safety and the adverse reactions and deaths witnessed by them is just horrendous and despicable.

Sick patients and pregnant women trying to cross state borders were often denied entry, which resulted in deaths and highly stressful situations and further deterioration in health. All in the name of saving peoples health. It made no medical sense at all. People were falsely labeled with dying of Covid when in fact their actual cause of death was something totally unrelated. But the result of that news on media outlets caused panic and fear in the masses and drove more fearful people to get the experimental gene therapy. And that fear turned into anger towards those who did not get vaccinated, creating a divide and resentment between family, friends , workmates and community. This fear driven rhetoric was driven by the government and politicians and senior health officials and the media. All those who drove that fear need to be held accountable. And there were many, in every state. The people remember who and what was said.

Many vaccinated received ongoing health conditions after their jab, many tried to report their injuries through the government channels and/or asked for compensation but have largely been ignored. We demand accountability. We demand an independent enquiry. We, the people, demand a Royal Commission into the corruption and the injustices that many suffered through these strict and unscientific mandates. We want Justice! And we will not stop until we get it!
