

SUBMISSION TO AUSTRALIAN GOVERNMENT COVID-19 ENQUIRY by WARREN ROSS

15th December 2023

My name is Warren Ross and I worked in an Aged Care facility in [REDACTED] before being dismissed from my job due to my unwillingness to take an mRNA or adenovirus injection. I was President of a local branch of the NSW Nurses and Midwives Association. I worked for many years as an information analyst for some of Australia's largest insurance companies.

EMPLOYMENT and DISMISSAL

From September 2021 to December 2021, I was able to continue working in aged care despite being unvaccinated due to an exemption that I received from a local doctor. In December, the NSW Minister for Health tightened the regulations around exemptions and ordered employees to act in enforcing them.

This affected me directly as I was told I could no longer work at the facility based on this exemption. This required my employer to assess the validity on which my exemption. This is an extraordinary situation where a non-medical person is called on to make an assessment that would normally be made by a doctor.

This matter went to the Fair Work Commission where an industrial officer from the NSW Nurses and Midwives sought pay for me during a period I was stood down until I was finally dismissed. A period of about a month.

The industrial officer refused to challenge my sacking on the basis of the refused exemption. He argued to me the right of the employer to make that decision. The Fair Work Commissioner fell into line on this issue too arguing the employer had the right to refuse the exemption.

THE THERAPEUTIC GOODS ADMINISTRATION (TGA)

The role of this body throughout the pandemic has been to rubber stamp pharmaceutical company demands. Based on Maryanne DeMasi's research, 96% of all funding accruing to the TGA comes from private pharmaceutical companies.

The confusion over the safety of Astra Zeneca and clots saw this product discouraged early in 2021 and then it was given a safety pass only to be removed off the schedule completely early this year.

We know that adequate testing was NOT carried out by our authorities in fact none was done at all. We took the word of the US FDA. We are

aware that [REDACTED]
[REDACTED]

In assessing and banning Ivermectin there were no appropriate clinical on the taskforce that had the responsibility for this decision.

EMERGENCY USE AUTHORITY

This was the greatest fraud of all and again the TGA was involved. In early March, it banned hydroxychloroquine and on 10th September it banned Ivermectin. There was NO justification for this. The latter had been given to 4 billion people world wide by mid pandemic. Remarkable successes were achieve in the Indian provinces of Uttar Pradesh and Goa.

In May this year, the ban was lifted with a warning not to use Ivermectit against Covid-19. This is a criminal organisation being supported, it seems, by government departments.

The only justification for banning these products is that Emergency Use Authority could not proceed as long as they were available so they had to be suppressed. In the process, across Australia a standard practice as implemented of get the injections or do NOTHING wait until you can't breathe and go to hospital where you likely to be denied antibiotics which actually does the killing not the virus (see: <https://warrenross.substack.com/p/spike-has-a-plan-whats-ours-revisited>).

VACCINES

It is clear that in many cases they proved dangerous. We have never seen the numbers of injured, maimed or killed from any other pharmaceutical product. The national death rate, last I checked, was 18% above the 5 year monthly average.

Yet, reports from the corrupted TGA tell us there is nothing to see. The AUSVAXSAFETY.ORG website takes a much more active role in trying to understand adverse events. Their numbers are MUCH higher than the TGA. They actively write out to vaccine recipients to understand their experience.

We do not know what the long term affect of these vaccines will be on the population. There have been so many sick and die that it is hard to believe that people who have no troubles may not face them in the future. The evidence has been clear for a long time. There is no excuse for the subsequent damage done to the population when after a mere few months it was clear that these vaccines were not behaving normally.

Another point that might be made is that they did not work. People continued to incur multiple infections and were told this was normal. The narrative kept changing not to assist public health but support the financial interests of big pharmaceutical outlets.

MEDIA

The role of the media throughout the Covid period has been disgraceful. This is particularly true of the ABC. Desperate efforts have been made to conceal from the general public the true nature of this so-called vaccination program.

The Federal Department of Health used the Department of Home Affairs to provide ideal social media candidates for censorship. The argument used was that the department was merely advising Facebook that its rules around Covid content had been broken. Is this really appropriate? Politicians refused to engage with regard to obvious lies that were being told to the public about safety, effectiveness of the vaccines and the supposed lack of alternatives.

QUALITY OF COVID INQUIRY COMMITTEE

Based on their past statements, alliance and responsibilities of the committee members along with the narrowness of the terms set for this inquiry, I am not particularly hopeful of a satisfying result.

Throughout the pandemic, Labor has shown itself to be the more zealous of the two major parties. I am at a loss as to why this is as such a position only led to greater hardship, misery, injury and death. Who would want this as their legacy and why. It seems many do.

INFLATION

When Covid started and the surplus no longer mattered, it became apparent to me that it must be a much bigger lie that was replacing the old deficit / surplus fraud. So it proved to be.

The management of Covid at all levels of government, by all parties has been a disgrace. You have sacrificed not only lives, increased issues of mental illness but have also gone a long way to destroying the economy. Some people might even think it was deliberate.
