

Submission to Federal Enquiry into Covid

By Dr. Pavel Faigl, PhD

Attn. The Chief Executive Officer - COVID-19 Response Inquiry Taskforce

Dear Sir/Madame,

Originally from Czechoslovakia, I have arrived in Australia as a political refugee in 1979. I have tertiary qualifications in Physics and Chemistry and have worked in my whole life in various industries and in academia both in Australia and overseas. After the final retirement 6 years ago, I continue to be still active as consultant and as a President of the local chapter of National Civic Council.

When the Covid news started to trickle into media in the association with an urgent need of mass vaccinations, I became alert. What struck me immediately was an indiscriminate push towards vaccinations, whereas the nature of the virus was still unknown. That did not make any sense. On the other side, the use of the proven chemotherapeutic antivirals (example: Ivermectin) started to be questioned while at the same time unproven vaccines were promoted as the only way of protection. Yet, the patent literature covering various vaccines for Corona viruses convinced me that the composition and make-up of these synthetic vaccines is highly likely going to cause an overdrive of the natural immunity response. That would obviously result in inflammatory reactions, which would show up, depending on the internal biochemistry of everyone, in the variety of organs. Unlike in the cases of therapeutics which work along and together with natural immunity, much more damage would ensue.

This indeed started to happen. As the time progresses more of the vaccines "side effects" became manifest, often with a fatal outcome.

It is a huge scandal. I know myself personally two people who suffered serious post vaxx complications. One, a [REDACTED] of [REDACTED] developed a [REDACTED] and is on forever on medication of [REDACTED]. The other, a youth of [REDACTED] developed myocarditis and required hospital stay but recovered. Many cases were shown for the public in "**Forest of the Fallen**" displays in the towns all over Australia. Why the need for such outcries when certain medicines have been proven safe and effective? You were not even allowed to mention the little Ivermectin tablet. You are cancelled when you ask for it. Doctors were not prescribing it. Doctors were threatened with jail. Many people, including nurses, firefighters, shop assistants were cancelled when they refused to take "the jab". Facebook, Twitter and Utube contain many distressing reports on people's experiences with totally unjustified communist style coercion (see attached comment by **pi314** on Experience with Covid_Utube_25_02_2023). Thus, it is not surprising that the questionable "benefits" (instead of supporting the natural immunity) of Covid vaccines show as a clear increase in **Death Rates** (the case is of UK with a larger population than Australia and hence stronger statistical significance): <https://www.ons.gov.uk/peoplepopulationandcommunity/birthsdeathsandmarriages/deaths/dataset/deathsbyvaccinationstatusengland>

A **screen grab** of one segment of their extensive tables is attached. This is an extremely disturbing finding indeed, but, from the foregoing, predictable.

We can then ask: are the regulatory authorities (TGA, state health departments, ministers, and their scientific advisers) taking money from the manufacturers and marketeers of vaccines? Is the TGA still taking money, donations, and budget fundings from the Big Farma? Were the major printed papers

and social media instructed or coaxed to report (or not to report) in a certain way about Covid-related issues? Why was the long awaited [REDACTED] report <https://phmpt.org/wp-content/uploads/2021/11/5.3.6-postmarketing-experience.pdf> getting so little attention in the media? It contains many disturbing clinical facts. Why there were no reactions from the Federal bodies like TGA to the open admissions in the [REDACTED] own report? With the Federal government policy on increased immigration, the occurrence of “23 reported cases of spontaneous abortions out of 270 pregnancies and more than 2,000 reports of cardiac disorders” <https://www.naturalnews.com/2023-09-18-secret-pfizer-report-mrna-covid-jab-killer.html> just within the first two months of the mRNA vaccine release in mid-December 2020 runs totally against its own population policy, while causing untold despair, sadness and stress for the mothers and families affected.

So, what went wrong? What is wrong even to this very day, with no apologies from the governmental and medical bodies for the damage done?

The line of actions recommended by the HRC https://humanrights.gov.au/about/news/media-releases/human-rights-commissioner-critical-covid-inquiry-scope?mkt_tok=OTA3LU9EWS0wNTEAAAGQBeW93yirmmP6inGro6Hy3eE6xltLjqZf6WEBeCj-mpKoGwcVSLprXJU5QIU1MzGZTg3biF_lg7ovyMXVyU1wmG92L9vHCmadww86P-LIBpkDhYD

is a good start, but its scope needs to be extended. In my submission I call for comprehensive investigation into:

Specific Pandemic Measures including mask and vaccine Mandates; lockdowns and curfews; including fear-mongering communication strategies deployed by public and medical officials.

Composition and Scope of the Inquiry including the bias of panel members (some officials have made statements which put into question their impartiality) which are overseeing this very Inquiry and the exclusion of unilateral State and Territory Government decisions. These must be covered as well!

All aspects of the government's response. Response to an increase in Death Rates.

It appears to me nevertheless, that nothing short of a Royal Commission into the COVID would be in position to cover all the above aspects fully, honestly, and transparently and have the executive powers to effect changes and seek legally binding redress of wrongs done.

Hence, even after this Federal Enquiry is completed (and it is my hope soon), I call for a full Royal Commission.

Thank you.

Dr. Pavel Faigl

Boy does this hit home. 65 years old, never vaccinated. Got Delta September 2021 and it nearly killed me. 16 days hospital ██████████, 8 month recovery. I ran into all kinds of different medical professionals during during the course of treatment and recovery, and the higher the rank and standing in the medical community, the more condescension and less empathy I received (e.g. doctors = rude, nurses = angels) because of my vaccination status, in a few cases outright shaming. Upon hospital discharge I was STERNLY warned that I better get vaccinated because if not and caught covid again, "It would not go well." Eventually found a new internist/family doctor who actually had the capacity for INDEPENDENT THOUGHT, and he strongly advised that I should NOT get vaccinated given my experience and the questionable safety and efficacy of the shots. Got omicron June 2022, absolutely terrified, and it was a total non-event. As was mentioned on this channel, omicron was the vaccine big pharma tried to make and failed. I have lost much respect for doctors in general, because many of them administer medical treatment without practicing the art of medicine, which, as they apparently have COMPLETELY FORGOTTEN, includes observation and using common sense.
